Green Mountain Phase 1

2025 Reserve Study

Completed By: Equip Consulting, LLC

Date: December 12, 2024

TABLE OF CONTENTS

1. SCOPE OF SERVICES AND BACKGROUND INFO

Equip Consulting (EC) was retained by the Green Mountain Phase 1 Homeowners Association, (GMP1HOA) to conduct annual Reserve Study, (RS) updates of their shared common elements for fiscal years' 2024 through 2026. The work undertaken by EC is in general conformance to the terms described within our three-year service agreement, dated February 10, 2023. The contract was issued to Ms. Tess Martin, Community Manager with Invest West Management LLC, (IWM). Ms. Amanda Bell, GMP1HOA Board President later signed and authorized EC to proceed with the proposed scope of services on behalf of the Association's Board of Directors, (BOD). For this year's update, (Fiscal Year 2025) EC will be preforming a Level Three RS. Scope of work can be found within the existing "authorized" agreement signed by Ms. Bell on April 25, 2023

In early 2024 the Association changed management firms and is now managed by Association Management Services NW, (AMS-NW)

Apart from the development of this RS, Equip Consulting has no other involvement with the Association.

The following information, documentation and communication were used to assist in completing the 2025 reserve funding plan:

- **General & Financial Information, (Provided By AMS-NW & GMP1HOA Board Members):**
  - Reserve Account Balance & Other Financial Data
- **Client Meetings & Communication:**
  - Reserve Study Overview Meeting, (Video): Completed on October 21, 2024
    - Attendees:
      - Amanda Bell – GMP1HOA Board Member
      - Andrea Guerber – GMP1HOA Board Member
      - Caleb VanderMolen - EC
  - All other communication was conducted via email and phone correspondence with Mitchell Lambert, (AMS-NW Community Manager) and GMP1HOA BOD representatives during the development of this year's RS.

2. EC PROJECT TEAM

Equip Consulting has nearly 20 years of experience working with Homeowner Associations by assisting them to be better prepared for the renewal and major repairs of their shared common elements. We have an extensive background in the building industry that allows us to better assess the existing conditions of the various components and assemblies commonly found on multi-family structures, (condos/townhomes) and those within single-family communities. Our knowledge base, established by years of contract negotiation with trade contractors, project budget development and on-going product research for each of the different markets and regions we serve, provide our clients with realistic costs and timelines for the replacement of their shared common elements.

The following personnel were assigned to complete this Reserve Study:

- **Caleb VanderMolen – Reserve Study & Maintenance Plan Professional**
    - **Client References:**
        - Edgefield Meadows – Gresham, OR
        - Austin Heritage – Vancouver, WA
        - Horn Rapids – Richland, WA
        - Depoe Hill – Depot Bay, OR
        - Rosedale Parks – Hillsboro, OR
        - Tetherow Master Community – Bend, OR

3. GENERAL COMMUNITY INFORMATION

Green Mountain Phase 1 HOA, (GMP1HOA) is a 227 single-family home community that resides within the City of Camas, WA. Prior to the development of the community, the land was owned by a public golf course, known as Green Mountain Golf Course. GMP1HOA is sub-association or neighborhood of an even larger master association understood to be called Green Mountain Master Association, which is still under construction, (as of 2023). Construction began in 2017 and was built over multiple phases, by multiple developers. GMP1HOA is divided into two groups or entities. The primary group includes all 227 homeowners and has been identified within this funding plan as "Common, (All Lots)". The second entity or group covers the shared common elements that reside within Pool Amenity, (Tracts "C" & "M"). The components found here are shared by all homeowners living within the Green Mountain Master Association. This group has been identified within this RS as "Limited Common, (Pool Amenity – Tract C & M). As a result of these independent entities, the contributions collected will need to be accounted for separately, ensuring the funds are appropriately used for the future renewal projects specific to each group's shared common elements.

The following information provides a brief summary of some of the components shared by each entity:

- **Common, (All Lots):** Components that fall under this group's responsibility are primarily contained within the common area tracts or private alleyways or streets. Some of these tracts provide pathways through or around the various phases within the community and include components such as concrete flatwork and curbing, landscaping care or maintenance of irrigation control devices and beauty bark replenishment. Other components include asphalt pavement at pathways and private alleyways. For a complete list of the shared common element and their estimated replacement costs owned by this group, see Appendix A, "Table 2: Shared Common Elements List".
- **Limited Common, (Pool Amenity – Tract C & M):** As noted earlier, all homeowners living within the Green Mountain Master Association, (understood to be 429 home lots) share in the responsibility of the care and replacement costs associated with the components found at the Community's pool amenity. Some of these components include but are not limited to the resurfacing of the pool and spa, pool side furniture and other outdoor living accessories, fence and gate systems. Other components include the care and renewal costs of the exterior cladding and roofing assemblies of the pool amenity structure. For a more comprehensive list of the shared common elements for this group, refer to Appendix D, "Table 5: Shared Common Elements List".

Community Location: NE 92nd Ave & NE Ingle Road – Camas, WA

4. ANALYTICS & FUNDING METHODOLOGIES

Reserve Study Analytics

The objective of this study is to provide a realistic assessment of the monetary reserves required to undertake the necessary repairs and/or replacement of the Association's shared common elements. EC's goal when developing these reports is to physically assess the various common elements located throughout the community, (completed year-one, under a three-year contract). We accomplish this by taking a "boots on the ground" approach which requires walking the entire community and seeing firsthand the present conditions of the shared common elements, and documenting our findings with recorded notes, and taking digital photographs. And although we don't record every nut and bolt, taking the time necessary to walk through the entire community allows us to see wholistically how the various common elements are performing, giving us the ability to provide a best guess estimation of their remaining useful life. And although the Association's CC&R's will provide some clarification to the common elements owned by Association, they can be ambiguous. And unless the RS consultant takes the time to thoroughly walk the community, components will be missed, and the end result is a reserve funding plan that is not accurately covering future expenditures.

Just as important, is how the pricing data used in the RS was attained. The majority of RS professionals will turn to agencies such as National Construction Estimator or RS Means, typically included in the boiler-plate reserve funding software most of them use. However, EC has reviewed countless RS where the consultants used such software, and when the components listed within their reports come to term, the actual costs were substantially more than what was forecasted, and the renewal dates incorrect. Due to this erroneous trend that is still followed by most RS professionals, EC has taken steps to develop pricing sheets for the components listed within our reports for each of the regions we services. Similar to our "boots on the ground" approach when conducting our field assessments, we take the time to meet with local contractors and industry professionals on a regular basis to get up-to-date, real unit costs and product data so our reports provide a realistic outlook of what our clients are likely to have to pay for the renewal of their shared common elements, and when they are likely to require replacement. Component costs and how they perform can vary dramatically from region to region, and if steps are not taken to ensure the data used within the RS are in line with local contractors and suppliers, then the risk to the Association to make decisions such as raising annual rates to their reserve assessments beyond the rate of inflation or require their members to be special assessed goes up dramatically.

Funding Methodologies

Some of the following information was taken directly from a Community Association Institute, (CAI" published best practices document, "Reserve Studies & Reserve Management". This document can be provided upon request.

There are two major types of funding plan methods: Cash Flow Method and Component Method.

- **Cash Flow Method:** A method of developing a reserve funding plan where contributions to the reserve fund are designed to offset the variable annual expenditures from the reserve fund. Different reserve funding plans are tested against the anticipated schedule and reserve expense until the desired funding goal is achieved. This method has also been called "pooling" and depending on the funding goal, can be less or more conservative than the component method.

- **Component Method:** A reserve funding plan where the total contribution is based on the sum of the contributions for the individual components. Prior to the adoption of the CAI National Standards, the term widely used was "Straight Line". This is a very conservative approach to the funding reserves. It requires that each item on the component inventory is established as its own account, so the yearly funding covers the total cost of replacement. Simply stated, you take the total cost of the component, (less any existing reserve amount) and divide it by the remaining life of the component.

  It is understood the Association has chosen the Cash Flow Method for their reserve funding plan.

Working in conjunction with the Cash Flow Method, are three commonly used funding goals. Below is a list of these goals, (listed in order or greatest risk) and includes a brief description of their differences.

- **Baseline Funding –** The objective of this funding goal is to keep the reserve's account balance over a 30-year period, at or above zero, ($0). This is accomplished by forecasting which of the shared common elements owned by the Association will likely be replaced and what their estimated renewal costs, (expenditures) are likely to be at the time of replacement, within the next 30 years. However, for components that have a longer lifespan that places their renewal date beyond the 30-year scope of the study, the annual reserve assessments are likely not accounting for these eventual replacement costs. As a general rule, components with a prolonged lifespan tend to be more expensive than those with shorter lifespans. For example, most siding products have a life span of 40 or more years, and depending on the size of the community, the replacement of these components can cost several millions of dollars. If the Association has been using the Baseline goal since year one, then it is very likely no funds have been collected within the reserves during for the first ten or more years of the siding's life. If the siding has a ten-year life, then at year 11, the siding replacement is now in full focus with the 30-year scope of the reserve funding schedule and will likely place the reserve's ending balance at year 30 well below $0. This will require the Members of the Association who now live within the community to dramatically increase their reserve assessments in order to correct the budget shortfall created by the insufficient funds collected. Furthermore, an Association using this funding goal should understand that any reduction in a component's remaining useful life can also result in a deficit in the reserve's cash balance and may require these funds to be generated via other means, such as a special assessment.
- **Threshold Funding –** This goal is similar to the Baseline funding concept, however, the minimum reserve cash balance in threshold funding is set at a predetermined dollar amount and is to remain at or above this amount for the entire duration set by the RS.
- **Full Funding** – The goal of this funding objective is to attain and maintain the reserve balance to equal the same value as the rate of deterioration of all the components shared by the Association. For example, if the Association has a component with a ten-year life and a $5,000 replacement cost, it should have $1,500 set aside for its replacement after three years, ($5,000 divided by 10 years = $500 per year X 3 years = $1,500). In this example, $1,500 equals full funding or 100% funded. Full funding is considered the safest method in terms of minimizing the risk to the Association's Members by having to generate funds via other means, such as special assessments.

It is recommended that the Association make every effort to reach the goal of Full Funding. Doing so will help to minimize the risk of their reserves from being depleted and causing future homeowners to sustain higher annual rate increases or unexpected special assessment demands.

- Fiscal Year Duration: **January 1, 2025 to December 31, 2025**
- Financial Data Related To Each Group/Entity, (As understood to have been reviewed and approved by the Association's Board of Director):
    - **Common, (All Lots):**
        - Estimated Reserve's Account Balance on January 1, 2025: **$90,216**
        - Estimated Annual Contributions to the Reserves for 2025: **$18,116**
    - **Limited Common, (Pool Amenity):**
        - Estimated Reserve's Account Balance on January 1, 2025: **$48,089**
        - Estimated Annual Contributions to the Reserves for 2025: **$12,100**

Assumed "Earned Interest" Rate, (EIR): An assumed EIR of 0.25%, (percent) will be applied annually to the reserve's account balance. The interest earned on the reserves for each year is based on a Mid-Year Interest Calculation. With the Mid-Year Interest Calculation, the interest earned is calculated at the middle of the fiscal year assuming that half the expenses have been taken out and half the annual contributions have been deposited into the reserves' account.

Estimated Inflation Rate, (IR): An estimated increase of 3.0% (percent) will be applied annually to the replacement costs for each component listed within this funding plan. Future assessment increases will also factor-in this estimated rate. The Association may require increases above the IR in order to overcome budgetary shortfalls that were identified during the development of this year's RS update. Appropriately managing scheduled assessment rate increases will help keep the reserve account properly funded over the established time period, (30-Years). EC recommends the Association look beyond the 30-year purview of this RS for any potential large expenditures that could place future homeowners within the community at risk of facing a special assessment or higher annual rate increases. The United States Federal Reserve's 30-year "Breakeven Inflation Rate" is currently recorded at 2.11%, (as of September 2024).

The following tables can be found in Chapters 5 & 6. The data they provide was essential during the development of this year's reserve funding plan.

- **Cash Flow Summary, (Tables 1 & 4):** Information found here provides a snapshot of the key financial data for each year. Information includes, scheduled reserve assessments and rate increases, expenditure totals, as well as the reserve account's beginning and closing balances. In short, this table summarize how the funds within the reserve account or accounts are impacted annually, over the 30-year purview of this study.

- **Shared Common Elements List, (Tables 2 & 5):** This table lists all of the components owned by the Association. Information found within includes but not limited to, date of procurement for each of the shared common elements, unit quantities, current replacement costs, as well as digital photographs to help better identify listed components. This data is then used to generate estimated replacement dates and replacement costs for the various common elements. Elements/Components are typically placed into categories or groups, such as common area tracts or zones. In some cases, components are grouped together due to their relationship with others. For example, communities where they share in ownership of the siding and roofing, these components would be categorized together because of their correlation to the buildings' exterior envelope systems.
- **Annual Expenditure Breakout, (Tables 3 & 6):** Some of the data provided in the forementioned cash flow summary chart can also be found within the annual expenditure breakout table. However, this table provides far more detail of each component's scheduled expenditure by listing more precise cost analysis within a given year, as opposed to an annual lump sum value found within the cash flow summary table.

Opinions of probable cost for remedial work are provided only as an estimation or guide. The repair or replacement costs are based on published construction cost data, recent bid prices on similar work, and information provided by the Association or their representatives. The opinions of probable cost can vary due to a number of reasons including changing market conditions, availability of new materials, systems, technology, or new code requirements.

The repairs and replacements forecasted do not represent a fixed schedule for any given element or component reviewed. Such repairs or replacements may be required sooner or later than anticipated. It should also be noted that these repairs and replacements may not all take place within one year's time and may not be required at all. However, it is prudent to budget for such repairs since failure of some components is somewhat unpredictable. The estimated service life assigned to each item assumes proper maintenance is conducted. Lack of maintenance will result in a decreased service life of various components.

EC recommends that the Association utilize the services of a 3rd party consultant when faced with the renewal of components that are considered complex or have a significant cost associated with their replacement. These design professionals will identify irregularities typically before any work begins, minimizing their client's exposure to unnecessary risks and ultimately saving them time and money. They should be actively involved in all phases of the rehabilitation process, (Design, Bidding, and Construction Administration). EC cautions the Association from taking on these responsibilities themselves or trusting their contractor to proceed with work under the terms set by the contractor's self-served contract.

5. FUNDING DATA & RESULTS
COMMON, (ALL LOTS)

					($482,241)			

* Funding plan assumes that all units/residence pay an equal share of the "Total Annual Contribution" value.

** Includes Projected Earned Interest

Executive Summary – Common, (All Lots)

The following information summarizes the reserve funding plan for fiscal year 2025, as reviewed and approved by the Association's Board of Directors, (BOD) for the above referenced group/entity. The balance within the reserve account is estimated to be $90,216 on January 1, 2025. The annual contributions to reserves for fiscal year 2025 are estimated to be $18,116. As previously mentioned, this funding plan assumes a 3.0% inflation rate will be applied annually to the current estimated replacement costs of the shared common elements. The annual rate increase to the reserve contributions will be set at 5.6%. The cost impact caused by inflation, as well as addressing any budgetary shortfalls over the next 30 years were the primary factors for this year's increase. For a complete list of the annual rate increases for the following 29 years, (2026 through 2054) please see Table 1: Cash Flow Summary of this RS, (See Page #11). A set annual EIR of 0.25% will be applied to the reserve funds' account balance as outlined in Chapter 4 of this RS.

Analysis

Physical Analysis – An onsite, physical analysis of the shared common elements was conducted on June 15, 2023. The field assessment portion of this RS was limited to a visual analysis and excludes invasive or destructive testing. Observations are recorded using a representative sampling of the common area components that includes, quantity take-offs, field measurements, and digital photographs to support observed and reported conditions. Observed deficiencies, (if any) will be noted in the comments section for each component listed within "Table 2: Shared Common Elements", (See Appendix A) of this RS.

Financial Analysis – As mentioned earlier, there are several funding goals when forecasting reserve assessments. The primary objective, regardless of which path is chosen is to ensure the financial stability of the reserve account so it not only meets the needs of the current or immediate residents living within the community, but also those in the future.

It is understood the Association has selected to use the "Full Funding" goal. The annual closing balance for 2025 is estimated to be $98,428, setting the reserve's funding percentage at 73%. Industry standards rate reserve accounts with funding percentages at or above 70% as strong and healthy. Reserve accounts that range from 31% to 69% funded are considered fair, in terms of financial solvency. Accounts at 30% or below are weak and have a high probability of requiring the Association to special assess their community's membership.

The chart below shows the three largest renewal periods anticipated by this study:

Year(s)	Major Renewal Tasks*	Total Annual Expenditures
2037	Asphalt Seal Coating @ Multiple Locations, (2nd Cycle)	Approx. $37K
2042	Mailbox Kiosks & Concrete Flatwork @ Vehicular Approaches	Approx. $227K
2047	Asphalt Seal Coating @ Multiple Locations, (3rd Cycle)	Approx. $62K

***See Table 3: Annual Expenditure Breakout, for a complete breakout of the scheduled renewal tasks & costs for the years listed above.**

Please note, that the forecasted repairs and replacements do not represent a fixed schedule for any given element or component reviewed. Such repairs or replacements may be required sooner or later than have anticipated. It should also be noted that these repairs and replacements may not all take place within one year's time and may not be required at all. However, it is prudent to budget for such repairs since failure of some components are somewhat unpredictable.

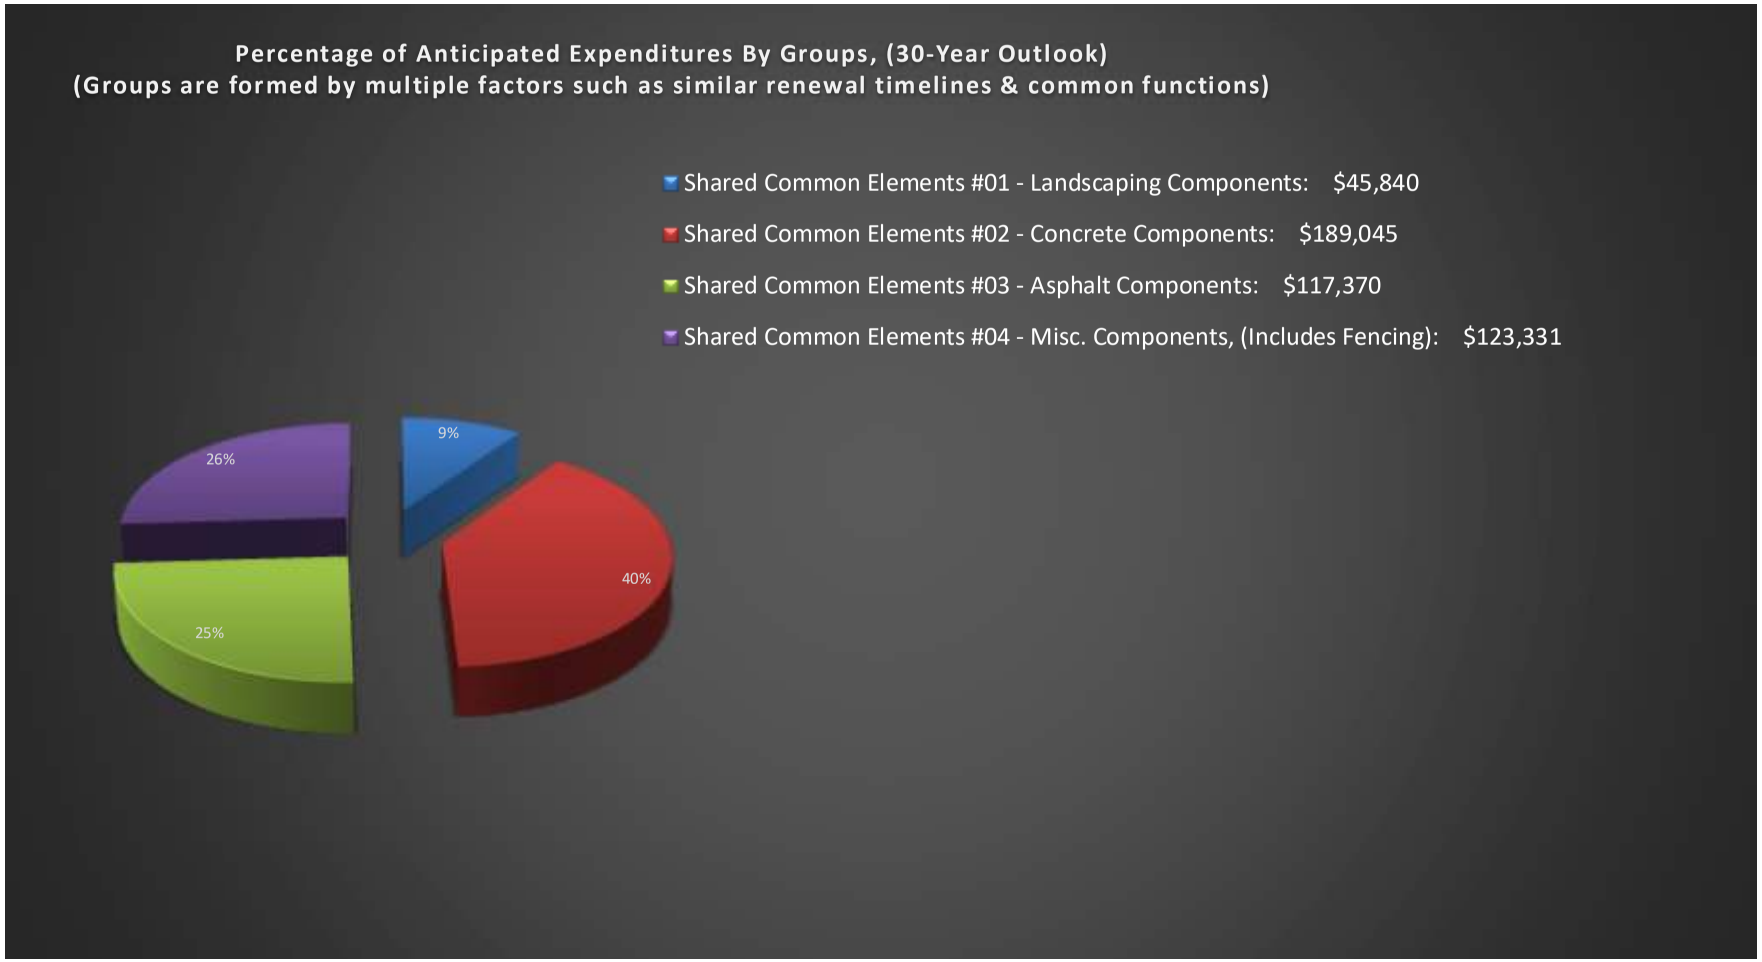
Results

The amount of funds within the reserve account will maintain a positive balance from fiscal years 2025 through 2054, (30 Years). Over this time, the funding percentage will fluctuate up and down multiple times before finishing approximately 100%. This places the Common, (All Lots) entity in a healthy/strong financial position when speaking specifically about the available funds within their reserves to cover expenditures that will be drawn against this account over the next 30 years. This is contingent on the Association following the established funding plan and goal, updating it annually, and how well they care and maintain their shared common elements.

Washington State RCW 64.38.070 RS Statute Disclosure Statement

"This reserve study should be reviewed carefully. It may not include all common and limited common element components that will require major maintenance, repair, or replacement in future years, and may not include regular contributions to a reserve account for the cost of such maintenance, repair, or replacement. The failure to include a component in a reserve study, or to provide contributions to a reserve account for a component, may, under some circumstances, require you to pay on demand as a special assessment your share of common expenses for the cost of major maintenance, repair, or replacement of a reserve component."

Common, (All Lots) - Expenditure Chart



APPENDIX A

TABLE 2: SHARED COMMON ELEMENTS LIST

This table provides a list of the shared common elements owned by the “Common, (All Lots)” group/entity. Data and information includes, but is not limited to component quantities, initial year of installation or last known year of replacement, and current estimated unit costs. In addition, this table may include a brief comment, clarification, or recommendation for each component listed. EC recommends that close attention be maintained for systems that could have an elevated maintenance requirement. These components are typically exposed to conditions where they are unlikely to fulfill their typical service life. However, it should be noted that in some instances a heightened maintenance plan can maximize the component’s serviceable life span. Where a specific material, component or assembly could not be verified during our field assessment, EC has assumed the components are suitable for their intended use. Replacement costs are based on assumed/estimated values the year this RS was developed.

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
SHARED COMMON ELEMENTS #1: TRACT "B"													
Sub-Section #1: Concrete Components													
1	Concrete Flatwork @ Vehicular Approaches		25	2017	8	0	17	1	2	EA	$4,500	$9,770	The life expectancy for concrete that is typically used by motor vehicles has a substantially shorter life than concrete used for pedestrian purposes. The concrete's service life is reduced even more when motor vehicles from multiple homeowners or commercial delivery trucks are forced to use limited easement points that lead to and from alleyways. For this and other potential contributing factors impacting these components, their assumed life expectancy is set at 25 years.
2	Formed Concrete Curbing		6	2023	2	0	4	1	15	LF	$30.00	$490	Concrete components are not likely to be replaced all at once, but over several years of their estimated life cycle, (60 Years). As a result, this funding plan assumes 10% of the total sum will be replaced over a six-year period of time with the next estimated replacement cycle scheduled to occur by fiscal year 2029. Future updates to this reserve study will be adjusted as these renewal periods come to term.
3	Stormwater Catch Basin		50	2017	8	0	42	1	2	EA	$7,500	$16,280	It is recommended these vaults be cleaned/dredged periodically. Cycles will depend on how much sludge/debris is collected annually. Contact a local contractor who specializes in this field for assistance with how often this maintenance task should be conducted. It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
Sub-Section #2: Asphalt Components													
4	Seal Coat, (Minor Renewal Task)		10	2017	8	0	2	1	5,700	SF	$0.20	$1,240	Sealcoating is the process of applying a protective asphalt-based coating to the surface of the pavement by providing a layer of protection from the elements such as water in it's various forms, foreign oils, and U.V. damage. This maintenance task should be conducted every 8 to 10 years.
5	Mill, Fill & Re-Top, (Major Renewal Task)		40	2017	8	0	32	1	5,700	SF	$2.25	$13,920	This invasive process involves milling the surface of the asphalt by grinding down the upper layer, (typically 1½" to 2"), followed by installing a layer of asphalt on top of the freshly milled surface to fill-in any holes or cracks. Finally, an asphalt overlay is applied to the top surface, (Re-Top) of the paved area for structural integrity and to level-off any potential irregularities. It is recommended this work be conducted every 32 to 40 years. This is dependent on how often the asphalt pavement is used and how well it is maintained.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Table 2: Shared Common Elements List, **(Estimated Replacement Cost are Based on Current Year Pricing)**

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
16	Formed Concrete Curbing		6	2023	2	0	4	1	35	LF	$30.00	$1,140	Concrete components are not likely to be replaced all at once, but over several years of their estimated life cycle, (60 Years). As a result, this funding plan assumes 10% of the total sum will be replaced over a six-year period of time with the next estimated replacement cycle scheduled to occur by fiscal year 2029. Future updates to this reserve study will be adjusted as these renewal periods come to term.
17	CMU Retaining Wall		50	2017	8	0	42	1	1,530	SF	$50.00	$83,000	It is understood the retaining walls that run along the west side of this tract and behind Lots 59 through 64 are owned and maintained by the Association. Estimated costs are for budgetary purposes only. It is recommended that as the renewal year approaches the Association hire the services of an engineering firm who will develop an appropriate scope of work that can be used to solicit quotes from qualified contractors that specialize in this field of construction. It is recommended this is done 10 years prior to the scheduled renewal date. It is also recommended that a structural and/or a geotechnical engineering review the conditions impacting this component every ten, (10) years to ensure they are performing as designed.
18	Stormwater Catch Basin		50	2017	8	0	42	1	2	EA	$7,500	$16,280	It is recommended these vaults be cleaned/dredged periodically. Cycles will depend on how much sludge/debris is collected annually. Common, (All Lots)

Table 2: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
Sub-Section #3: Misc. Components													
21	Signs, (Plate Only)		10	2017	8	0	2	1	4	EA	$75.00	$330	It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
22	Signs, (Plates & Posts)		20	2017	8	0	12	1	4	EA	$250	$1,090	It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
23	Mailbox Kiosk, (16-Box Cluster, w/2 Parcel Locker)		25	2017	8	0	17	1	3	EA	$3,250	$10,580	These components are located near this tract. The estimated replacement costs for this line item are intended for the full replacement of these components. Funds necessary for periodic lock-&-key hardware will be managed via the operating budget or by other means.
SHARED COMMON ELEMENTS #4: TRACT "I"													
Sub-Section #1: Landscaping Components													
24	Irrigation Control Devices	Photo Pending	5	2022	3	0	2	1	1	EA	$150	$160	Funds provided here cover the replacement or updating of the more prominent devices within the irrigation system, such as control valves, timers, backflow prevention devices, etc. These components are not likely to be replaced all at once, but over multiple years throughout their anticipated life cycle, (25 Years). As a result, this funding plan assumes 20% of the estimated total sum will be replaced over a five-year period of time with the next renewal cycle scheduled to conclude by the end of fiscal year 2028. Future updates to this RS will be made as these renewal cycles come to term. Funds for periodic replacement or repairs to damage sprinkler heads and lines are assumed to come from property's annual operating budget or via other means.
25	Tree Maintenance, Removal & Replacement		5	2022	3	0	2	1	1	EA	$500	$540	Budgetary line item for tree care & maintenance tasks such as removal & replacement, or possible new plantings, as well as larger scale pruning projects within the community's common area tracts. Funding plan assumes the estimated costs and cycles will take place over a five-year period of time and on an "As-Needed" basis. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from reserves. This information will need to come from the Association.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Table 2: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Sub-Section #4: Misc. Components													
31	4' Wood Fencing, (Refinishing)		7	2017	8	0	0	1	85	LF	$6.50	$600	The assumed scope of work includes targeted repairs to failed or damaged fence assemblies. It is recommended the fence boards be refinished/stained every five to seven years in order to help these components reach their estimated life expectancy. Estimated Unit Cost covers only refinishing of the side that faces out towards Tract "I" and North 93rd Avenue. The refinishing of other side that faces towards Tract "H" is understood to be the responsibility of the Master Association. It is also understood the Master Association is the owner of this fence and is responsible for repairs and the eventual replacement of this fence. **2024 RS Notes:** It appears this work has not been done for quite some time and the fence is beginning to show advance signs of wear. It is recommended these components be refinished this fiscal year. In addition, several trim board of the fence are beginning to warp and are pulling away from the fence structure. It is recommended the Association contact the Master Association to address this issue as soon as possible before this condition worsens and becomes a more costly repair.
SHARED COMMON ELEMENTS #5: TRACT "J"													
Sub-Section #1: Concrete Components													
32	Concrete Flatwork @ Vehicular Approaches		25	2017	8	0	17	1	2	EA	$4,500	$9,770	The life expectancy for concrete that is typically used by motor vehicles has a substantially shorter life than concrete used for pedestrian purposes. The concrete's service life is reduced even more when motor vehicles from multiple homeowners or commercial delivery trucks are forced to use limited easement points that lead to and from alleyways. For this and other potential contributing factors impacting these components, their assumed life expectancy is set at 25 years.
33	Stormwater Catch Basin		50	2017	8	0	42	1	1	EA	$7,500	$8,140	It is recommended these vaults be cleaned/dredged periodically. Cycles will depend on how much sludge/debris is collected annually. Contact a local contractor who specializes in this field for assistance with how often this maintenance task should be conducted. It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
Sub-Section #2: Asphalt Components													
34	Seal Coat, (Minor Renewal Task)		10	2017	8	0	2	1	8,500	SF	$0.20	$1,840	Sealcoating is the process of applying a protective asphalt-based coating to the surface of the pavement by providing a layer of protection from the elements such as water in it's various forms, foreign oils, and U.V. damage. This maintenance task should be conducted every 8 to 10 years.
35	Mill, Fill & Re-Top, (Major Renewal Task)		40	2017	8	0	32	1	8,500	SF	$2.25	$20,750	This invasive process involves milling the surface of the asphalt by grinding down the upper layer, (typically 1½" to 2"), followed by installing a layer of asphalt on top of the freshly milled surface to fill-in any holes or cracks. Finally, an asphalt overlay is applied to the top surface, (Re-Top) of the paved area for structural integrity and to level-off any potential irregularities. It is recommended this work be conducted every 32 to 40 years. This is dependent on how often the asphalt pavement is used and how well it is maintained.

Sub-Section #1: Landscaping Components													
47	Beauty Bark		3	2023	2	0	1	1	1	EA	$750	$810	Replenishment cycles are scheduled to occur once every three years
48	Landscaping Rocks		5	2022	3	0	2	1	1	EA	$250	$270	Funding plan assumes the estimated replenishment costs and cycles will take place over a five year period of time and on an "As-Needed" basis. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account. This information will need to come from the Association.
49	Irrigation Control Devices	Photo Pending	5	2022	3	0	2	1	1	EA	$150	$160	Funds provided here cover the replacement or updating of the more prominent devices within the irrigation system, such as control valves, timers, backflow prevention devices, etc. These components are not likely to be replaced all at once, but over multiple years throughout their anticipated life cycle, (25 Years). As a result, this funding plan assumes 20% of the estimated total sum will be replaced over a five-year period of time with the next renewal cycle scheduled to conclude by the end of fiscal year 2027. Future updates to this RS will be made as these renewal cycles come to term. Funds for periodic replacement or repairs to damage sprinkler heads and lines are assumed to come from property's annual operating budget or via other means.
Sub-Section #2: Fencing Components													
50	6' Chain Link Fence, (Vinyl Coated)		25	2017	8	0	17	1	65	LF	$0.00	$0	These components are understood to be owned and maintained by the Master Association. Therefore, no funds have been allocated within this funding plan for their eventual replacement. They are listed here to provide clarification that the Association identifies their existence within the community and where maintenance and renewal responsibility have been assumed.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Common, (All Lots)

Table 2: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
51	Mailbox Kiosk, (16-Box Cluster, w/2 Parcel Locker)		25	2017	8	0	17	1	4	EA	$3,250	$14,110	These components are located near this tract. The estimated replacement costs for this line item are intended for the full replacement of these components. Funds necessary for periodic lock-&-key hardware will be managed via the operating budget or by other means.
SHARED COMMON ELEMENTS #8: TRACT "T"													
Sub-Section #1: Concrete Components													
52	Concrete Flatwork @ Vehicular Approaches		25	2017	8	0	17	1	1	EA	$4,500	$4,880	The life expectancy for concrete that is typically used by motor vehicles has a substantially shorter life than concrete used for pedestrian purposes. The concrete's service life is reduced even more when motor vehicles from multiple homeowners or commercial delivery trucks are forced to use limited easement points that lead to and from alleyways. For this and other potential contributing factors impacting these components, their assumed life expectancy is set at 25 years.
53	Formed Concrete Curbing		6	2023	2	0	4	1	5	LF	$30.00	$150	Concrete components are not likely to be replaced all at once, but over several years of their estimated life cycle, (60 Years). As a result, this funding plan assumes 10% of the total sum will be replaced over a six-year period of time with the next estimated replacement cycle scheduled to occur by fiscal year 2029. Future updates to this reserve study will be adjusted as these renewal periods come to term.
54	Stormwater Catch Basin		50	2017	8	0	42	1	1	EA	$7,500	$8,140	It is recommended these vaults be cleaned/dredged periodically. Cycles will depend on how much sludge/debris is collected annually. Contact a local contractor who specializes in this field for assistance with how often this maintenance task should be conducted. It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
Sub-Section #2: Asphalt Components													
55	Seal Coat, (Minor Renewal Task)		10	2017	8	0	2	1	850	SF	$0.20	$180	Sealcoating is the process of applying a protective asphalt-based coating to the surface of the pavement by providing a layer of protection from the elements such as water in it's various forms, foreign oils, and U.V. damage. This maintenance task should be conducted every 8 to 10 years.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Common, (All Lots)

Table 2: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
56	Mill, Fill & Re-Top, (Major Renewal Task)		40	2017	8	0	32	1	850	SF	$2.25	$2,080	This invasive process involves milling the surface of the asphalt by grinding down the upper layer, (typically 1½" to 2"), followed by installing a layer of asphalt on top of the freshly milled surface to fill-in any holes or cracks. Finally, an asphalt overlay is applied to the top surface, (Re-Top) of the paved area for structural integrity and to level-off any potential irregularities. It is recommended this work be conducted every 32 to 40 years. This is dependent on how often the asphalt pavement is used and how well it is maintained.
Sub-Section #3: Misc. Components													
57	Signs, (Plate Only)		10	2017	8	0	2	1	1	EA	$75.00	$80	It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
58	Signs, (Plates & Posts)		20	2017	8	0	12	1	1	EA	$250	$270	It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
SHARED COMMON ELEMENTS #9: TRACT "V"													
Sub-Section #1: Concrete Components													
59	Concrete Flatwork @ Vehicular Approaches		25	2017	8	0	17	1	1	EA	$4,500	$4,880	The life expectancy for concrete that is typically used by motor vehicles has a substantially shorter life than concrete used for pedestrian purposes. The concrete's service life is reduced even more when motor vehicles from multiple homeowners or commercial delivery trucks are forced to use limited easement points that lead to and from alleyways. For this and other potential contributing factors impacting these components, their assumed life expectancy is set at 25 years.
60	Formed Concrete Curbing		6	2017	8	0	0	1	10	LF	$30.00	$310	Concrete components are not likely to be replaced all at once, but over several years of their estimated life cycle, (60 Years). As a result, this funding plan assumes 10% of the total sum will be replaced over a six-year period of time with the next estimated replacement cycle scheduled to occur by fiscal year 2029. Future updates to this reserve study will be adjusted as these renewal periods come to term.

* Quantity of years needed or scheduled to complete the renewal process.

Table 2: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
SHARED COMMON ELEMENTS #10: TRACT "W"													
Sub-Section #1: Landscaping Components													
66	Beauty Bark		3	2023	2	0	1	1	1	EA	$500	$540	Replenish cycles are scheduled to occur once every three years.
67	Landscaping Rocks	Photo Pending	5	2022	3	0	2	1	1	EA	$250	$270	Funding plan assumes the estimated replenishment costs and cycles will take place over a five year period of time and on an "As-Needed" basis. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account. This information will need to come from the Association.
Sub-Section #2: Concrete Components													
68	Concrete Flatwork @ Vehicular Approaches & Sidewalks		25	2017	8	0	17	1	1	EA	$6,000	$6,510	The life expectancy for concrete that is typically used by motor vehicles has a substantially shorter life than concrete used for pedestrian purposes. The concrete's service life is reduced even more when motor vehicles from multiple homeowners or commercial delivery trucks are forced to use limited easement points that lead to and from alleyways. For this and other potential contributing factors impacting these components, their assumed life expectancy is set at 25 years. Estimated Unit Cost includes replacement of a small section of concrete flatwork installed at a pedestrian sidewalk located within this tract.
69	Formed Concrete Curbing		6	2023	2	0	4	1	25	LF	$30.00	$800	Concrete components are not likely to be replaced all at once, but over several years of their estimated life cycle, (60 Years). As a result, this funding plan assumes 10% of the total sum will be replaced over a six-year period of time with the next estimated replacement cycle scheduled to occur by fiscal year 2029. Future updates to this reserve study will be adjusted as these renewal periods come to term.
70	ADA Truncated Dome Pads		15	2017	8	0	7	1	3	EA	$750	$2,440	It is recommended the Association keep the surface of these components clean of debris throughout the year. Annual condition reviews should be administered to ensure they are performing as designed and meet Federal ADA requirements.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Common, (All Lots)

Table 2: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
71	Stormwater Catch Basin		50	2017	8	0	42	1	2	EA	$7,500	$16,280	It is recommended these vaults be cleaned/dredged periodically. Cycles will depend on how much sludge/debris is collected annually. Contact a local contractor who specializes in this field for assistance with how often this maintenance task should be conducted. It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
Sub-Section #3: Asphalt Components													
72	Seal Coat @ Parking Area, (Minor Renewal Task)		10	2017	8	0	2	1	5,240	SF	$0.20	$1,140	Sealcoating is the process of applying a protective asphalt-based coating to the surface of the pavement by providing a layer of protection from the elements such as water in it's various forms, foreign oils, and U.V. damage. This maintenance task should be conducted every 8 to 10 years.
73	Mill, Fill & Re-Top @ Parking Area, (Major Renewal Task)		40	2017	8	0	32	1	5,240	SF	$2.25	$12,790	This invasive process involves milling the surface of the asphalt by grinding down the upper layer, (typically 1½" to 2"), followed by installing a layer of asphalt on top of the freshly milled surface to fill-in any holes or cracks. Finally, an asphalt overlay is applied to the top surface, (Re-Top) of the paved area for structural integrity and to level-off any potential irregularities. It is recommended this work be conducted every 32 to 40 years. This is dependent on how often the asphalt pavement is used and how well it is maintained.
74	Seal Coat @ Pedestrian Pathway, (Minor Renewal Task)		10	2017	8	0	2	1	1,380	SF	$0.20	$300	Seal coating is the process of applying a protective asphalt-based coating to the surface of the pavement by providing a layer of protection from the elements such as water in it's various forms, foreign oils, and U.V. damage. This minor renewal task should be conducted every 8 to 10 years.
75	Mill, Fill & Re-Top @ Pedestrian Pathway, (Major Renewal Task)		40	2017	8	0	32	1	1,380	SF	$4.00	$5,990	This invasive process involves milling the surface of the asphalt by grinding down the upper layer, (typically 1" to 1½"), followed by installing a layer of asphalt on top of the freshly milled surface to fill-in any holes or cracks. Finally, an asphalt overlay is applied to the top surface, (Re-Top) of the paved area for structural integrity and to level-off any potential irregularities. It is recommended this work be conducted every 32 to 40 years. This is dependent on how often the asphalt pavement is used and how well it is maintained. Unlike the typical application of the Mill, Fill & Overlay at asphalt paved streets or alleyways where contractors can bring in large, heavy machinery to assist with this work, for smaller projects however, such as pedestrian pathways, the use of this equipment is typically not feasible and will require additional labor costs to complete. As a result, a premium has been added to the Estimated Unit Costs for this scope of work.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

96	Stormwater Catch Basin		50	2017	8	0	42	1	1	EA	$7,500	$8,140	It is recommended these vaults be cleaned/dredged periodically. Cycles will depend on how much sludge/debris is collected annually. Contact a local contractor who specializes in this field for assistance with how often this maintenance task should be conducted. It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
Sub-Section #2: Asphalt Components													
97	Seal Coat, (Minor Renewal Task)		10	2017	8	0	2	1	5,145	SF	$0.20	$1,120	Sealcoating is the process of applying a protective asphalt-based coating to the surface of the pavement by providing a layer of protection from the elements such as water in it's various forms, foreign oils, and U.V. damage. This maintenance task should be conducted every 8 to 10 years.
98	Mill, Fill & Re-Top, (Major Renewal Task)		40	2017	8	0	32	1	5,145	SF	$2.25	$12,560	This invasive process involves milling the surface of the asphalt by grinding down the upper layer, (typically 1½" to 2"), followed by installing a layer of asphalt on top of the freshly milled surface to fill-in any holes or cracks. Finally, an asphalt overlay is applied to the top surface, (Re-Top) of the paved area for structural integrity and to level-off any potential irregularities. It is recommended this work be conducted every 32 to 40 years. This is dependent on how often the asphalt pavement is used and how well it is maintained.
Sub-Section #3: Misc. Components													
99	Signs, (Plate Only)		10	2017	8	0	2	1	7	EA	$75.00	$570	It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
100	Signs, (Plates & Posts)		20	2017	8	0	12	1	2	EA	$250	$540	It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Common, (All Lots)

Table 2: Shared Common Elements List, **(Estimated Replacement Cost are Based on Current Year Pricing)**

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
SHARED COMMON ELEMENTS #13: MISC. COMPONENTS													
Sub-Section #1: Asphalt Components													
101	Crack Sealing @ All Locations		1	2024	1	0	0	1	1	EA	$1,000	$1,090	Crack sealing is low-cost method to help prolong the estimated life cycle. Cracks in the asphalt over a 1/4" wide should be sealed as soon as possible. Annual updates will provide clarification of the amount of funds spent during the previous fiscal year. This information will need to come from the Association.
102	General Contingency Fund	N/A	1	2024	1	0	0	1	1	EA	$7,500	$8,140	Budgetary line item designed for small or minor expenditures of components installed throughout the community that may not be covered in one of the line items listed above within this reserve funding plan. Additionally, these funds can be used for potential costs of unknown or unexpected renewal expenditures of the community's shared common elements. Funds should "NOT" considered as a slush account for unnecessary expenditures outside of the Association's shared common elements.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

APPENDIX B

TABLE 3: ANNUAL EXPENDITURE BREAKOUT

This table is generated by using the estimated values established by "Table 2: Shared Common Elements List", (See Appendix A). Its primary purpose is designed to provide a complete breakout of the annual expenditures for each of the shared common elements over the 30-year period of this study. The estimated renewal costs listed within this table have factored-in the assumed rate of inflation, (3.0%).

Common, (All Lots)

Table 3: Annual Expenditure Breakout, (30-Year Outlook)

	Total Expenses inflated at 3% annually	$10,140	$3,069	$22,035	$1,191	$8,576	$2,203	$1,672	$12,323	$1,381	$1,422	$10,241	$2,630	$36,542	$4,376	$2,556

* Funding plan assumes that all units/residence pay an equal share of the "Total Annual Contribution" value.

** Includes Projected Earned Interest

Executive Summary – Limited Common, (Pool Amenity – Tracts C & M)

The following information summarizes the reserve funding plan for fiscal year 2025, as reviewed and approved by the Association's Board of Directors, (BOD) for the above referenced group/entity. The balance within the reserve account is estimated to be $48,089 on January 1, 2025. The annual contributions to reserves for fiscal year 2025 are estimated to be $12,100. As previously mentioned, this funding plan assumes a 3.0% inflation rate will be applied annually to the current estimated replacement costs of the shared common elements. The annual rate increase to the reserve contributions will be set at 54.6%. The cost impact caused by inflation, as well as addressing any budgetary shortfalls over the next 30 years were the primary factors for this year's increase. For a complete list of the annual rate increases for the following 29 years, (2026 through 2054) please see Table 4: Cash Flow Summary of this RS, (See Page #52). A set annual EIR of 0.25% will be applied to the reserve funds' account balance as outlined in Chapter 4 of this RS.

Analysis

Physical Analysis – An onsite, physical analysis of the shared common elements was conducted on June 15, 2023. The field assessment portion of this RS was limited to a visual analysis and excludes invasive or destructive testing. Observations are recorded using a representative sampling of the common area components that includes, quantity take-offs, field measurements, and digital photographs to support observed and reported conditions. Observed deficiencies, (if any) will be noted in the comments section for each component listed within "Table 5: Shared Common Elements", (See Appendix D) of this RS.

Financial Analysis – As mentioned earlier, there are several funding goals when forecasting reserve assessments. The primary objective, regardless of which path is chosen is to ensure the financial stability of the reserve account so it not only meets the needs of the current or immediate residents living within the community, but also those in the future.

It is understood the Association has selected to use the "Full Funding" goal. The annual closing balance for 2025 is estimated to be $50,011, setting the reserve's funding percentage at 59%. Industry standards rate reserve accounts with funding percentages at or above 70% as strong and healthy. Reserve accounts that range from 31% to 69% funded are considered fair, in terms of financial solvency. Accounts at 30% or below are weak and have a high probability of requiring the Association to special assess their community's membership.

The chart below shows the three largest renewal periods anticipated by this study:

Year(s)	Major Renewal Tasks*	Total Annual Expenditures
2039	Pool Resurfacing, (2nd Application) & Pool Equipment	Approx. $126K
2044	Multiple Interior Renewal Projects @ Pool Amenity	Approx. $115K
2049	5' Metal Fence Renewal	Approx. $222K

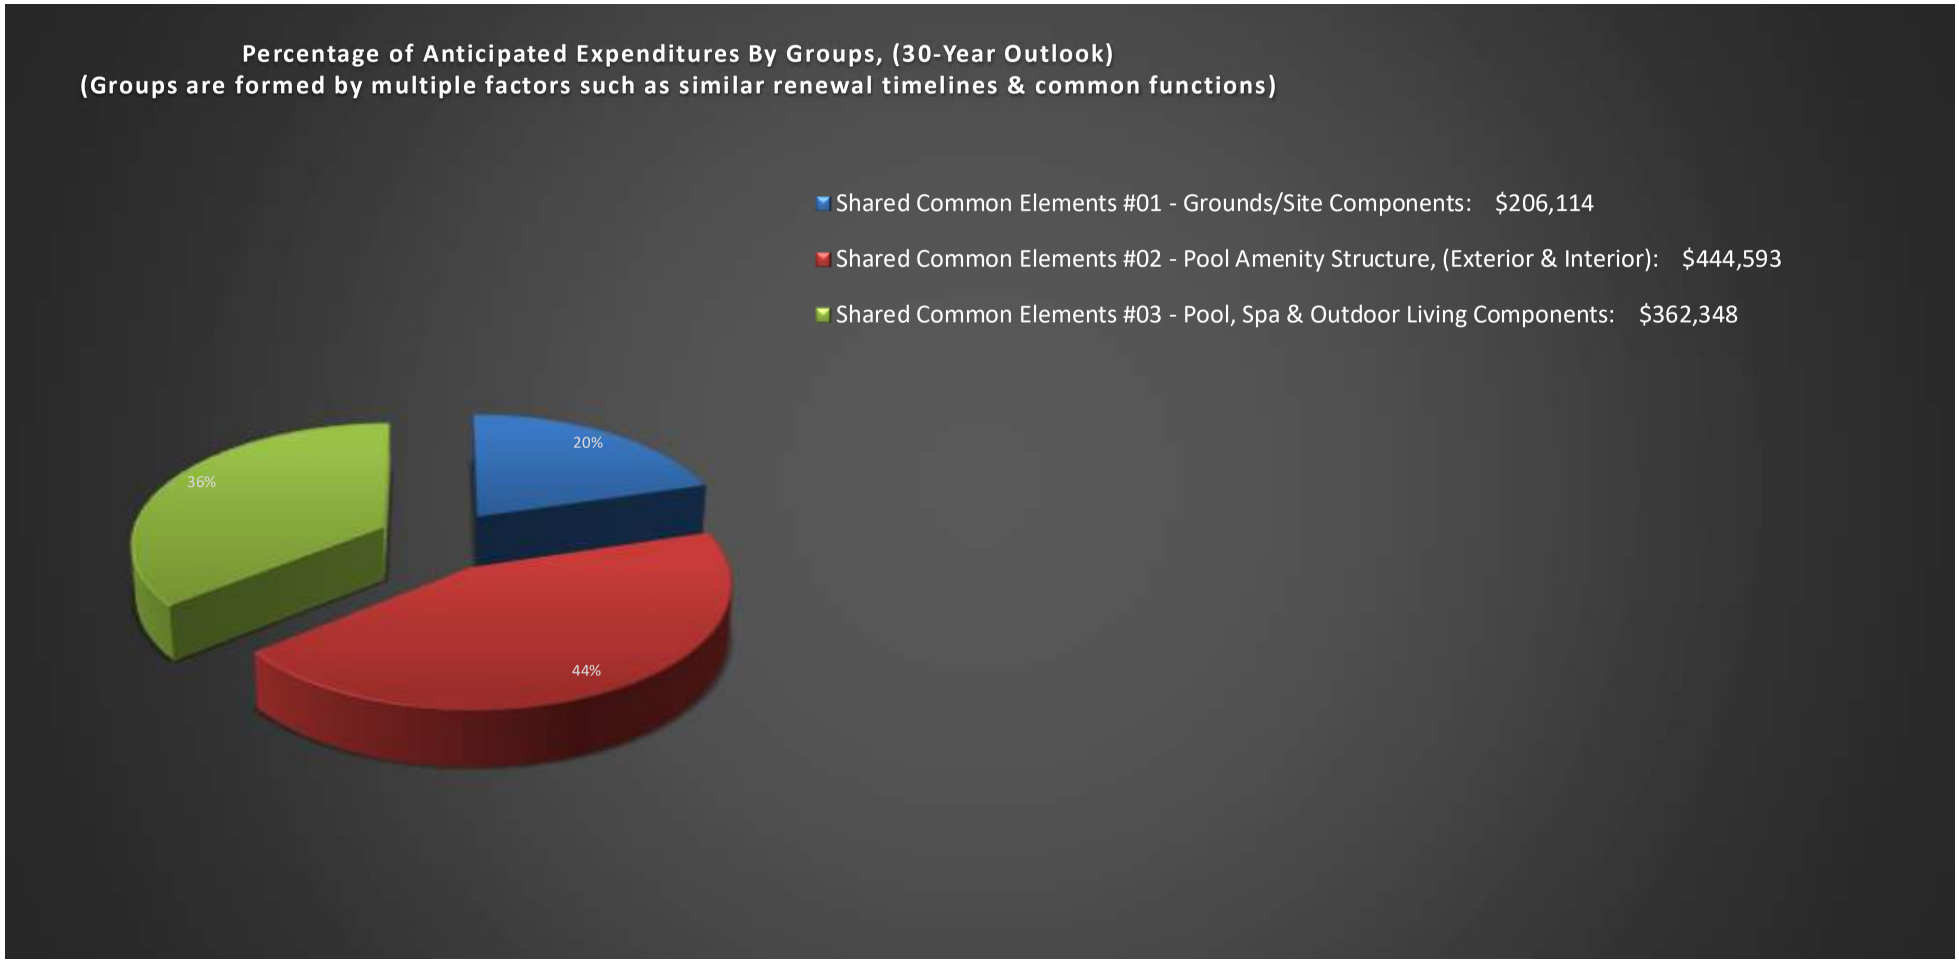
***See Table 6: Annual Expenditure Breakout, for a complete breakout of the scheduled renewal tasks & costs for the years listed above.**

Please note, that the forecasted repairs and replacements do not represent a fixed schedule for any given element or component reviewed. Such repairs or replacements may be required sooner or later than have anticipated. It should also be noted that these repairs and replacements may not all take place within one year's time and may not be required at all. However, it is prudent to budget for such repairs since failure of some components are somewhat unpredictable.

Results

The amount of funds within the reserve account will maintain a positive balance from fiscal years 2025 through 2054, (30 Years). Over this time, the funding percentage will fluctuate up and down multiple times before finishing approximately 184%. This places the Limited Common, (Pool Amenity – Tracts C & M) entity in a strong financial position when speaking specifically about the available funds within their reserves to cover expenditures that will be drawn against this account over the next 30 years. This is contingent on the Association following the established funding plan and goal, updating it annually, and how well they care and maintain their shared common elements.

Limited Common, (Pool Amenity - Tracts C & M) - Expenditure Chart



APPENDIX D

TABLE 5: SHARED COMMON ELEMENTS LIST

This table provides a list of the shared common elements owned by the "Limited Common, (Pool Amenity – Tracts C & M)" group/entity. Data and information includes, but is not limited to component quantities, initial year of installation or last known year of replacement, and current estimated unit costs. In addition, this table may include a brief comment, clarification, or recommendation for each component listed. EC recommends that close attention be maintained for systems that could have an elevated maintenance requirement. These components are typically exposed to conditions where they are unlikely to fulfill their typical service life. However, it should be noted that in some instances a heightened maintenance plan can maximize the component's serviceable life span. Where a specific material, component or assembly could not be verified during our field assessment, EC has assumed the components are suitable for their intended use. Replacement costs are based on assumed/estimated values the year this RS was developed.

Limited Common, (Pool Amenity - Tracts C & M)

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
SHARED COMMON ELEMENTS #1: GROUNDS/SITE COMPONENTS													
Sub-Section #1: Landscaping Components													
1	Beauty Bark Replenishment/Refresh		3	2022	3	0	0	1	1	EA	$2,000	$2,170	Replenishment cycles are scheduled to occur once every three years
2	Lawn Aeration		3	2022	3	0	0	1	1	EA	$500	$540	Scheduled work is assumed to be done once every three years.
3	Landscaping Rocks Replenishment, (Includes Gravel Pathway)		5	2024	1	0	4	1	1	EA	$1,000	$1,090	Funding plan assumes the estimated replenishment costs and cycles will take place over a five year period of time and on an "As-Needed" basis. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account. This information will need to come from the Association.
4	Tree Maintenance, Removal & Replacement		5	2024	1	0	4	1	1	EA	$1,500	$1,630	Budgetary line item for tree care & maintenance tasks such as removal & replacement, or possible new plantings, as well as larger scale pruning projects within the community's common area tracts. Funding plan assumes the estimated costs and cycles will take place over a five-year period of time and on an "As-Needed" basis. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from reserves. This information will need to come from the Association.
5	Irrigation Control Devices		5	2024	1	0	4	1	5	EA	$150	$810	Funds provided here cover the replacement or updating of the more prominent devices within the irrigation system, such as control valves, timers, backflow prevention devices, etc. These components are not likely to be replaced all at once, but over multiple years throughout their anticipated life cycle, (25 Years). As a result, this funding plan assumes 20% of the estimated total sum will be replaced over a five-year period of time with the next renewal cycle scheduled to conclude by the end of fiscal year 2028. Future updates to this RS will be made as these renewal cycles come to term. Funds for periodic replacement or repairs to damage sprinkler heads and lines are assumed to come from property's annual operating budget or via other means.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Limited Common, (Pool Amenity - Tracts C & M)

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
Sub-Section #2: Concrete Components													
6	Concrete Flatwork @ Vehicular Approaches		30	2019	6	0	24	1	1	EA	$4,500	$4,880	The life expectancy for concrete that is typically used by motor vehicles has a substantially shorter life than concrete used for pedestrian purposes. For this and other potential contributing factors impacting these components, their assumed life expectancy is set at 30 years.
7	Concrete Flatwork, (Sidewalks)		6	2025	0	0	6	1	240	SF	$12.50	$3,250	Concrete components are not likely to be replaced all at once, but over several years of their estimated life cycle, (60 Years). As a result, this funding plan assumes 10% of the total sum will be replaced over a six-year period of time with the next estimated replacement cycle scheduled to occur by fiscal year 2031. Future updates to this reserve study will be adjusted as these renewal periods come to term.
8	Formed Concrete Curbs		6	2025	0	0	6	1	45	LF	$30.00	$1,460	Concrete components are not likely to be replaced all at once, but over several years of their estimated life cycle, (60 Years). As a result, this funding plan assumes 10% of the total sum will be replaced over a six-year period of time with the next estimated replacement cycle scheduled to occur by fiscal year 2031. Future updates to this reserve study will be adjusted as these renewal periods come to term.
9	ADA Truncated Dome Pads		15	2019	6	0	9	1	2	EA	$0.00	$0	These components are not owned by the Association and therefore have been excluded from this funding plan. Renewal and maintenance costs are assumed to be be the responsibility of the City of Camas or Clark County. They are listed within this funding plan to provide clarification that the Association identifies their existence within the community and where care and replacement responsibilities have been assumed.
10	Stormwater Catch Basin		50	2019	6	0	44	1	2	EA	$7,500	$16,280	It is recommended these vaults be cleaned/dredged periodically. Cycles will depend on how much sludge/debris is collected annually. Contact a local contractor who specializes in this field for assistance with how often this maintenance task should be conducted. It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
Sub-Section #3: Fencing Components													
11	Emergency/Panic Push Bar Hardware @ Entry Gates, (Replacement)		8	2019	6	0	2	1	2	EA	$1,250	$2,710	It is recommended these be monitored multiple times a month to ensure they are functioning as designed and meet Federal ADA Requirements. Repairs or replacements of damaged components should be administered immediately.
12	5' Metal Fence, (Refinishing)		8	2019	6	0	2	1	400	LF	$15.00	$6,510	It is recommended the metal perimeter fence assemblies be refinished once every five to seven years, in order to help them reach their estimated service life. **2024 RS Notes:** The finish on the metal fencing is showing advanced signs of fading/deterioration and is recommended to be refinished within the next year.
13	5' Metal Fence "Entry Gates", (Replacement)		16	2019	6	0	10	1	2	EA	$2,500	$5,430	It is recommended these be monitored multiple times a month to ensure they are functioning as designed and meet Federal ADA Requirements. Repairs or replacements of damaged components should be administered immediately. It is recommended the metal perimeter fence assemblies be refinished once every five to seven years, in order to help them reach their estimated service life.
14	5' Metal Fence & Attached Assemblies, (Full Replacement)		48	2019	6	0	42	1	400	LF	$100	$43,400	It is recommended the metal perimeter fence assemblies be refinished once every five years, in order to help them reach their estimated service life. Estimated service life is heavily dependent on how well the fence is maintained and if regular refinishing cycles are followed.
Sub-Section #4: Asphalt Components													
15	Seal Coat, (Minor Renewal Task)		10	2019	6	0	4	1	7,060	SF	$0.20	$1,530	Sealcoating is the process of applying a protective asphalt-based coating to the surface of the pavement by providing a layer of protection from the elements such as water in it's various forms, foreign oils, and U.V. damage. This maintenance task should be conducted every 8 to 10 years. It is assumed funds for periodic crack sealing will be drawn from reserves and will be noted/documented here during the development of the following fiscal year's RS update.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Limited Common, (Pool Amenity - Tracts C & M)

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
16	Mill, Fill & Re-Top, (Major Renewal Task)		40	2019	6	0	34	1	7,060	SF	$2.25	$17,240	This invasive process involves milling the surface of the asphalt by grinding down the upper layer, (typically 1½" to 2"), followed by installing a layer of asphalt on top of the freshly milled surface to fill-in any holes or cracks. Finally, an asphalt overlay is applied to the top surface, (Re-Top) of the paved area for structural integrity and to level-off any potential irregularities. It is recommended this work be conducted every 32 to 40 years. This is dependent on how often the asphalt pavement is used and how well it is maintained.
Sub-Section #5: Misc. Components													
17	Signs, (Plate Only)		10	2019	6	0	4	1	7	EA	$75.00	$570	It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
18	Signs, (Plates & Posts)		20	2019	6	0	14	1	2	EA	$438	$950	It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual updates to this RS will include reference notes that will be used to record the work completed during the previous fiscal year and the amount of funds that were drawn from the reserve account.
19	Pet Waste Station		15	2019	6	0	9	1	1	EA	$500	$540	
SHARED COMMON ELEMENTS #2: BUILDING ENVELOPE COMPONENTS													
Sub-Section #1: Exterior Cladding Assemblies													
20	Cedar Siding & Pergola, (Refinishing/Staining)		5	2019	6	0	0	1	1	EA	$2,500	$2,710	It is recommended these components be re-stained once every five years. **2024 RS Notes:** The cedar siding and pergola are in need of refinishing. It is recommended this work be done this fiscal year.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Limited Common, (Pool Amenity - Tracts C & M)

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
21	Siding & Trim, (Refinishing/Painting)		10	2019	6	0	4	1	1	EA	$2,000	$2,170	Estimated funds to refinish all exterior cladding assemblies, (including exterior doors). Excludes cladding assemblies that require a stain finish. See Line Item #20 for staining schedule. It is recommended that a two-coat, 25 year paint be used when scheduled renewal periods come to term.
22	Siding & Trim, (Replacement)		40	2019	6	0	34	1	2,030	EA	$15.00	$33,040	Estimated replacement costs are for the full removal and replacement of the exterior cladding assemblies. The assumed scope of work includes, but may not be limited to replacing all siding profiles & soffits, stone masonry, (located at BBQ's & Pergolas) corner trim, belly bands, beam wraps, door trim, columns, pulling & resetting doors, (to properly waterproof rough openings), penetration blocks and painting/staining.
23	Exterior Swing Doors, (Single & Double Hinged)		25	2019	6	0	19	1	1	EA	$14,750	$16,000	Estimated Replacement Costs includes the removal and replacement of exterior entry doors and door hardware. Excludes replacement funds for security systems that may be affixed. It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual RS updates will include reference notes that can be used to record "known" replacement work conducted during the previous fiscal year and the amount of funds that were drawn from the reserve account. This information will need to come from the Association.
Sub-Section #2: Roofing Assemblies													
24	Asphaltic Roof Shingles		20	2019	6	0	14	1	1,225	SF	$6.50	$8,640	Estimated renewal costs includes replacement of asphaltic roofing shingles, vents and other roof penetrations as well as flashing assemblies and roof underlayment. Follow manufacture maintenance requires and recommendations to help prolong the life of the roofing assemblies.
25	Gutter & Downspouts		25	2019	6	0	19	1	60	LF	$10.00	$650	

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Limited Common, (Pool Amenity - Tracts C & M)

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
Sub-Section #3: Misc. Components													
26	Electrical & Plumbing System Components		6	2025	0	0	6	1	1	EA	$1,000	$1,090	Estimated Unit Cost includes, but may not be limited to the replacement of water spigots, (hose bibs) light fixtures, electrical receptacles, infrared detectors, automated external defibrillators, fire extinguishers, emergency shut-off switches, etc. These components are not likely to be replaced all at once, but over multiple years throughout their estimated life cycle, (30 Years). As a result, this funding plan assumes an average of 20% of the overall cost to replace these components will take place over a six-year period of time, with the next estimated replacement period scheduled to conclude by the end of fiscal year 2031. Future updates to this RS will be made as these renewal periods come to term. It is recommended that the Association hire a certified licensed professional when replacing any electrical, plumbing or mechanical components.
SHARED COMMON ELEMENTS #3 POOL, SPA & OUTDOOR LIVING COMPONENTS													
Sub-Section #1: Cementitious & Ceramic Components													
27	Pool & Spa Resurfacing, (Cement/Plaster)		10	2019	6	0	4	1	1	EA	$30,000	$32,550	Estimated costs are for budgetary purposes only. It is recommended that as the renewal year approaches the Association solicit quotes from qualified contractors that specialize in this field of construction. It is recommended this is done three, (3) years prior to the scheduled renewal date. Follow manufacture's care and maintenance recommendations and requirements at their scheduled timelines.
28	Submerged Ceramic Tiles, (AKA: Water-Line Tiles)		20	2019	6	0	14	1	200	LF	$50.00	$10,850	Estimated costs are for budgetary purposes only. It is recommended that as the renewal year approaches the Association solicit quotes from qualified contractors that specialize in this field of construction. It is recommended this is done three, (3) years prior to the scheduled renewal date. Follow manufacture's care and maintenance recommendations and requirements at their scheduled timelines.
29	Concrete Flatwork, (Pool Deck)		6	2025	0	0	6	1	615	SF	$25.00	$16,680	Concrete components are not likely to be replaced all at once, but over several years of their estimated life cycle, (60 Years). As a result, this funding plan assumes 10% of the total sum will be replaced over a six-year period of time with the next estimated replacement cycle scheduled to occur by fiscal year 2026. Future updates to this reserve study will be adjusted as these renewal periods come to term. It is recommended that the Association hire a contractor who is familiar with replacing concrete or masonry components that are adjacent to swimming pools as this may require a different set of skills and tools to ensure or minimize the risk of damage to the pool itself.
Sub-Section #2: Outdoor Living Components													
30	Pool Side Furniture & Accessories		2	2023	2	0	0	1	1	EA	$4,000	$4,340	Estimated Unit Cost includes, but may not be limited to the replacement of pool side tables, chairs, loungers, umbrellas, grab rails & ladders, signs/notices, etc. These components are not likely to be replaced all at once, but over multiple years throughout their estimated life cycle, (10 Years). As a result, this funding plan assumes an average of 20% of the overall cost to replace these components will take place over a two-year period of time, with the next estimated replacement period to conclude by the end of fiscal year 2026. Future updates to this RS will be made as these renewal periods come to term.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Limited Common, (Pool Amenity - Tracts C & M)

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
31	Gas BBQ's		10	2019	6	0	4	1	2	EA	$1,750	$3,800	
32	Pool & Spa Covers		10	2019	6	0	4	1	1	EA	$10,000	$10,850	
SHARED COMMON ELEMENTS #4: INTERIOR COMPONENTS, (INCLUDES POOL PUMP EQUIPMENT)													
Sub-Section #1: Flooring, Walls & Ceiling Profiles													
33	Flooring - Traffic Coating		10	2019	6	0	4	1	340	SF	$10.00	$3,690	A fluid applied traffic coating has been installed over the concrete slab foundation within the vestibule and both bathrooms. It is recommended the traffic coating be cleaned throughout the year or during seasonal periods when the pool amenity is in use. Follow recommended and required cleaning methods for the type of coating installed.
34	Walls & Ceiling Refinishing/Painting		15	2019	6	0	9	1	1,320	SF	$3.50	$5,010	Estimated funds are for the refinishing of the interior walls and ceilings where applicable. Includes pump room.
35	Ceramic Tiled Walls		25	2019	6	0	19	1	960	SF	$40.00	$41,660	Estimated life expectancy for these components are heavily based on how well they are maintained, and how quickly repairs are administered when required. This includes regularly checking grout joints, and conducting repairs as needed. It is recommended the Association consider purchasing spare tiles that match the existing profile exactly. Doing so, will keep a consistent look when one or more tiles require replacement due to damage or failure.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Limited Common, (Pool Amenity - Tracts C & M)

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
36	Interior Swing Doors, (Single Hinged)		25	2019	6	0	19	1	2	EA	$1,500	$3,260	Estimated Replacement Costs includes the removal and replacement of interior swing doors and door hardware. It is assumed that the replacement of these components will be addressed on an "As Needed" basis and will take place over an extended period of time. Annual RS updates will include reference notes that can be used to record "known" replacement work conducted during the previous fiscal year and the amount of funds that were drawn from the reserve account. This information will need to come from the Association.
Sub-Section #2: Electrical, Plumbing & Mechanical System Components													
37	Pool Systems & Operational Components		3	2025	0	0	3	1	1	EA	$6,250	$6,780	Estimated renewal costs are intended for the eventual replacement of the various system components designed to keep the community pools operating properly. Components include, but may not be limited to Auto Levelers, Heaters, System Pumps, and Filtration Devices. Because these components not likely to be replaced all at once, but over multiple years throughout their assumed life cycles, (24 Years), this funding plan estimates that 12.5% of the total sum will be replaced over a three-year period of time with the next estimated replacement period to conclude by the end of fiscal year 2028. Future updates to this reserve study will be made as these renewal periods come to term. It is recommended the Association hire a certified, licensed professional when replacing electrical, plumbing or mechanical components
38	Misc. Electrical & Mechanical Components		6	2025	0	0	6	1	1	EA	$1,000	$1,090	Components covered here include: switches, outlets, lighting, wall mounted space heaters, exhaust fans, electrical breaker switches, etc. These components are not likely to be replaced all at once, but over multiple years throughout their estimated life cycle, (30 Years). As a result, this funding plan assumes an average of 20% of the overall cost to replace these components will take place over a six-year period of time, with the next estimated replacement period scheduled to conclude by the end of fiscal year 2031. Future updates to this RS will be made as these renewal periods come to term. It is recommended the Association hire a certified, licensed professional when replacing electrical, plumbing or mechanical system components.
39	Plumbing Components, (Includes Misc. Assemblies Installed at Bathrooms)		6	2025	0	0	6	1	1	EA	$2,000	$2,170	Components covered here include: water spigots, sink & shower faucets, sinks basins, toilets, water heater, ADA grab bars, mirrors, changing stations, soap and paper dispensers, etc. These components are not likely to be replaced all at once, but over multiple years throughout their estimated life cycle, (30 Years). As a result, this funding plan assumes an average of 20% of the overall cost to replace these components will take place over a six-year period of time, with the next estimated replacement period scheduled to conclude by the end of fiscal year 2031. Future updates to this RS will be made as these renewal periods come to term. It is recommended the Association hire a certified, licensed professional when replacing electrical, plumbing or mechanical system components.
40	Security Surveillance & Life Safety Equipment		7	2019	6	0	1	1	1	EA	$2,500	$2,710	Components covered here include, but may not be limited to fire extinguishers, fire alarm, emergency call phone, digital cameras, surveillance computer and monitor, etc. Funding plan assumes these components will be replaced at various times during their estimated life expectancy as opposed to all at once. Annual updates to this RS will include reference notes of work completed during the previous fiscal year. This information will need to come from the Association or their representatives. It is recommended the Association hire a certified, licensed professional when replacing electrical, plumbing or mechanical system components.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

Table 5: Shared Common Elements List, (Estimated Replacement Cost are Based on Current Year Pricing)

Item #	Item Description	Component Caption	Estimated Life Expectancy	Assumed Year of Acquisition	Present Age	Adjustment To Estimated Life Expectancy	Estimated Time To First Replacement	Number of Annual Phases *	Quantity	Unit of Measure	Estimated Unit Cost	Current Estimated Replacement Costs **	Notes/Comments/Recommendations
41	Security Entry System - Unfunded	Photo Pending	1	2019	6	0	0	1	0		$0.00	$0	Unfunded. Placeholder for potential change to the current entry system to the pool amenity. No funds have been allocated here due to the Board still deciding which system or changes they are likely to do.
Sub-Section #3: Misc. Components													
42	Contingency Funds	N/A	1	2024	1	0	0	1	1	EA	$500	$540	Budgeted allowance for potential unknown or unforeseen maintenance or renewal costs for the various components and assemblies that reside within the pool amenity.

* Quantity of years needed or scheduled to complete the renewal process.

** Renewal costs listed are the current values should the scheduled replacement take place the year this RS was completed..

APPENDIX E

TABLE 6: ANNUAL EXPENDITURE BREAKOUT

This table is generated by using the estimated values established by "Table 5: Shared Common Elements List", (See Appendix D). Its primary purpose is designed to provide a complete breakout of the annual expenditures for each of the shared common elements over the 30-year period of this study. The estimated renewal costs listed within this table have factored-in the assumed rate of inflation, (3.0%).

Limited Common, (Pool Amenity - Tracts C & M)

Table 6: Annual Expenditure Breakout, (30-Year Outlook)

	Total Expenses inflated at 3% annually	$10,300	$3,348	$14,959	$10,960	$71,549	$3,768	$47,893	$664	$9,615	$24,934	$29,889	$747	$57,187	$793	$126,210
	Fiscal Year	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14

APPENDIX F

FIVE-YEAR EXPENDITURES OUTLOOK

2025		
1	Beauty Bark Replenishment/Refresh	$2,170
2	Lawn Aeration	$540
20	Cedar Siding & Pergola, (Refinishing/Staining)	$2,710
30	Pool Side Furniture & Accessories	$4,340
42	Contingency Funds	$540
		$10,300

2026		
40	Security Surveillance & Life Safety Equipment	$2,791
42	Contingency Funds	$556
		$3,348

2027		
11	Emergency/Panic Push Bar Hardware @ Entry Gates, (Replacement)	$2,875
12	5' Metal Fence, (Refinishing)	$6,906
30	Pool Side Furniture & Accessories	$4,604
42	Contingency Funds	$573
		$14,959

2028		
1	Beauty Bark Replenishment/Refresh	$2,371
2	Lawn Aeration	$590
37	Pool Systems & Operational Components	$7,409
42	Contingency Funds	$590
		$10,960

2029		
3	Landscaping Rocks Replenishment, (Includes Gravel Pathway)	$1,227
4	Tree Maintenance, Removal & Replacement	$1,835
5	Irrigation Control Devices	$912
15	Seal Coat, (Minor Renewal Task)	$1,722
17	Signs, (Plate Only)	$642
21	Siding & Trim, (Refinishing/Painting)	$2,442
27	Pool & Spa Resurfacing, (Cement/Plaster)	$36,635
30	Pool Side Furniture & Accessories	$4,885
31	Gas BBQ's	$4,277
32	Pool & Spa Covers	$12,212
33	Flooring - Traffic Coating	$4,153
42	Contingency Funds	$608
		$71,549

7. SUMMARY

Equip Consulting has reviewed and assessed the reserve requirements for each entity/group within the Green Mountain Phase 1 Homeowners Association in accordance with the scope of services indicated within the authorized service agreement and the "Limitations" outlined in Appendix H of this report.

The following table summarizes the results of the study:

2025 Board Approved Funding Goals	Estimated Annual Contribution*	Estimated "Average" Monthly Contribution Per Lot**
Common, (All Lots)	$18,116	$6.65
Limited Common, (Pool Amenity)	$12,100	$2.35

* **Financial figures are for year one of this study, January 1, 2025 to December 31, 2025**

Calculations of the accumulated funds within each group's reserve accounts include the interest earned per the estimated rates established by the Association.

The RS is a dynamic document that will change over time as repairs and/or replacements are carried out for each of the shared common elements included within this RS, as well as the ever-changing interest and inflation rates that affect our economy. As such, regular updates to the available reserve funds, including visual reviews of the shared common elements are necessary to re-assess the financial planning needs of the Association. EC also recommends that the Board of Directors review local and state laws, the Association's governing documents, as well as their community's goals and objectives in relationship to their investment decisions. We also recommend that the Association utilize the services of a financial planner who can implement an investment strategy to maximize the rate of return on the accumulated reserve funds. This will put the Association in a proactive position to plan for future replacement work prior to the common elements reaching a fully deteriorated condition, which may result in less expensive repair costs.

The annual contributions to the reserve account have been established by the Board of Directors.

Sincerely,
Equip Consulting

Caleb VanderMolen, Principal
Reserve Study & Maintenance Plan Professional

PROCEDURE

FIELD TRAVERSES WERE PERFORMED WITH A TRIMBLE S6 TOTAL STATION (1") AND ADJUSTED BY LEAST SQUARES. THE FIELD TRAVERSES MET THE MINIMUM STANDARDS FOR SURVEYS AS DESIGNATED IN WAC 332-130-090.

UTILITY EASEMENT

A PUBLIC UTILITY EASEMENT IS HEREBY RESERVED OVER, UNDER AND UPON ALL DESIGNATED PRIVATE ROAD TRACTS AND/OR EASEMENTS, AND THE EXTERIOR 0.00 FEET OF ALL LOTS LYING PARALLEL WITH AND ADJACENT TO ALL PUBLIC AND PRIVATE ROADS AND THOSE PORTIONS OF LOTS 70, 71, 74 AND 75 AS SHOWN HEREON FOR THE PURPOSE OF INSTALLING, CONSTRUCTING, RENEWING, OPERATING AND MAINTAINING OF ELECTRIC, TELEPHONE, TV, CABLE, WATER, SANITARY SEWER, AND OTHER UTILITIES AS NOTED. ALL LOTS CONTAINING PAD MOUNT TRANSFORMERS ARE SUBJECT TO THE MINIMUM WORKING CLEARANCES AS DEFINED BY CLARK PUBLIC UTILITIES CONSTRUCTION STANDARDS. ALL PROPOSED BUILDING DESIGNS ON THESE LOTS MUST PROVIDE ADEQUATE CLEARANCE FOR ALL COMBUSTIBLE MATERIALS. ALSO, A SIDEWALK EASEMENT IS RESERVED, AS NECESSARY TO COMPLY WITH ADA SLOPE REQUIREMENTS, UPON THE EXTERIOR SIX (6) FEET OF ALL LOTS AND TRACTS PARALLEL WITH AND ADJACENT TO THE PUBLIC ROAD FRONTAGES.

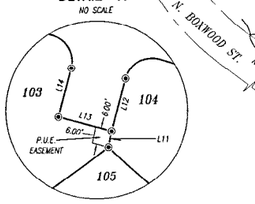
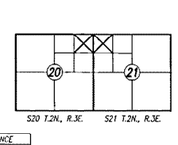
DETAIL "A"

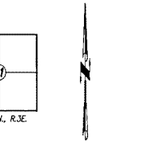
NO SCALE



BASIS OF BEARINGS

BEARINGS ARE BASED ON THE WASHINGTON STATE COORDINATE SYSTEM (SOUTH ZONE - 4602) U.S. SURVEY FEET, BASED ON TRAVERSES BY OLSON ENGINEERING, INC. PERFORMED DURING PREVIOUS SURVEY RECORDED IN BK. 51, PG. 161 AND AS SHOWN IN GREEN MOUNTAIN MIXED USE P.R.D. PHASE 1 (SOUTH). DISTANCES SHOWN HEREON ARE GROUND AND HAVE BEEN SCALED BY A COMBINED GRID TO GROUND SCALE FACTOR OF 0.999992076.





LEGEND

- SET 1/2" X 24" IRON ROD WITH PLASTIC CAP STAMPED (OLSON ENG PLS 42667) DURING THIS SURVEY
- SET 1/2" X 24" IRON ROD WITH PLASTIC CAP STAMPED (OLSON ENG PLS 42667) TO BE SET AFTER RECORDING OF THIS PLAT
- + SET BRASS SCREW WITH WASHER STAMPED (OLSON ENG PLS 42667) AT PROPERTY CORNER OR IN CURB ON A PROJECTION OF THE LOT LINE (DISTANCE ALONG PROJECTION SHOWN)
- POSITION OF SET MONUMENT STAMPED (OLSON ENG PLS 42667) AS SHOWN IN PREVIOUS OLSON ENGINEERING SURVEY FOR GREEN MOUNTAIN MIXED USE P.R.D. PHASE 1 (SOUTH)
- ● FOUND MONUMENT AS NOTED
- ○ CALCULATED POSITION (NOTHING SET)
- ( ) RECORD DISTANCE / ANGLE
- BUILDING SETBACK LINES
- EASEMENT LINE AS NOTED
- PROPOSED LOT LINES
- DIMENSIONAL TIE LINE (NOT A LINE OF OWNERSHIP)
- PLAT PERIMETER
- T= TANGENT BEARING
- PVT PRIVATE

PROCEDURE

FIELD TRAVERSES WERE PERFORMED WITH A TRIMBLE S6 TOTAL STATION (3") AND ADJUSTED BY LEAST SQUARES. THE FIELD TRAVERSES MET THE MINIMUM STANDARDS FOR SURVEYS AS DESIGNATED IN WAC 332-130-090.

UTILITY EASEMENT

A PUBLIC UTILITY EASEMENT IS HEREBY RESERVED OVER, UNDER AND UPON ALL DESIGNATED PRIVATE ROADS AND/OR EASEMENTS, AND THE EXTERIOR 8.00 FEET OF ALL LOTS LYING PARALLEL WITH AND ADJACENT TO ALL PUBLIC ROADS AND THE NORTH SIDE OF NE CHERRY ST. (PVT) AND PORTION OF LOT 103 AS SHOWN FOR THE PURPOSE OF INSTALLING, CONSTRUCTING, RENEWING, OPERATING AND MAINTAINING OF ELECTRIC, TELEPHONE, TV, CABLE, WATER, SANITARY SEWER, AND OTHER UTILITIES AS NOTED. ALL LOTS CONTAINING PAD MOUNT TRANSFORMERS ARE SUBJECT TO THE MINIMUM WORKING CLEARANCES AS DEFINED BY CLARK PUBLIC UTILITIES CONSTRUCTION STANDARDS. ALL PROPOSED BUILDING DESIGNS ON THESE LOTS MUST PROVIDE ADEQUATE CLEARANCE FOR ALL COMBUSTIBLE MATERIALS. ALSO, A SIDEWALK EASEMENT IS RESERVED, AS NECESSARY TO COMPLY WITH ADA SLOPE REQUIREMENTS, UPON THE EXTERIOR SIX (6) FEET OF ALL LOTS AND TRACTS PARALLEL WITH AND ADJACENT TO THE PUBLIC ROAD FRONTAGES.

05-10-17

LAND SURVEYOR'S CERTIFICATION

ON THE BASIS OF MY KNOWLEDGE, INFORMATION AND BELIEF, I CERTIFY TO CITY OF CAMAS THAT AS A RESULT OF A SURVEY MADE ON THE GROUND TO THE NORMAL STANDARD OF CARE OF PROFESSIONAL LAND SURVEYORS PRACTICING IN CLARK COUNTY, I FIND THAT THIS PLAT, AS SHOWN, IS A TRUE RETURN FROM THE FIELD AND THAT THE DELINEATION IS CORRECT.

JOHN M. BLAKIE

NOTES

A PRIVATE STORM SEWER EASEMENT OVER, UNDER, AND UPON PORTIONS OF LOTS 108 THROUGH 122 INCLUSIVE, 124, 132 THROUGH 140 INCLUSIVE, AND 151 THROUGH 154 INCLUSIVE AS SHOWN HEREON IS HEREBY RESERVED FOR AND GRANTED TO THE HOMEOWNERS ASSOCIATION (HOA), AND IT'S ASSIGNS, WITH THE RECORDING OF THIS PLAT FOR THE PURPOSE OF STORM WATER CONVEYANCE. THE HOA SHALL BE RESPONSIBLE FOR THE MAINTENANCE AND REPAIR OF THE STORM WATER CONVEYANCE IMPROVEMENTS WITHIN THE EASEMENT AREA, AND SHALL HAVE RIGHT OF ACCESS ACROSS SAID LOTS TO PERFORM SUCH RESPONSIBILITIES, AND FOLLOWING SUCH USE SHALL RETURN THE EASEMENT AREA TO IT'S PRIOR CONDITION AS NEAR AS POSSIBLE.

UTILITY EASEMENT

A PUBLIC UTILITY EASEMENT IS HEREBY RESERVED OVER, UNDER AND UPON THE EXTERIOR 6.00 FEET OF ALL LOTS AND TRACTS LYING PARALLEL WITH AND ADJACENT TO ALL PUBLIC ROADS FOR THE PURPOSE OF INSTALLING, CONSTRUCTING, RENEWING, OPERATING AND MAINTAINING OF BUT NOT LIMITED TO ELECTRIC, TELEPHONE, TV, CABLE, WATER, GAS, SANITARY SEWER, AND STORM WATER, AND SHALL HAVE RIGHT OF ACCESS FOR SUCH USE. FOLLOWING SUCH USE THE EASEMENT AREA SHALL BE RESTORED TO IT'S PRIOR CONDITION AS NEAR AS POSSIBLE. ALL LOTS CONTAINING PAD MOUNT TRANSFORMERS ARE SUBJECT TO THE MINIMUM WORKING CLEARANCES AS DEFINED BY CLARK PUBLIC UTILITIES CONSTRUCTION STANDARDS. ALL PROPOSED BUILDING DESIGNS ON THESE LOTS MUST PROVIDE ADEQUATE CLEARANCE FOR ALL COMBUSTIBLE MATERIALS.

PUBLIC SIDEWALK EASEMENT

A PUBLIC SIDEWALK EASEMENT IS HEREBY RESERVED OVER, UNDER AND UPON THE EXTERIOR 6.00 FEET OF ALL LOTS AND TRACTS LYING PARALLEL WITH AND ADJACENT TO ALL PUBLIC ROADS AS NECESSARY TO COMPLY WITH ADA SLOPE REQUIREMENTS.

TRACT NOTES

TRACT "TT" IS HEREBY CONVEYED TO THE CITY OF CAMAS WITH THE RECORDING OF THIS PLAT FOR THE PURPOSE OF RECREATIONAL OPEN SPACE AND COMMUNITY NEIGHBORHOOD PARK. THE PARK IS TO BE OWNED BY THE CITY OF CAMAS. MAINTENANCE IS THE RESPONSIBILITY OF THE HOME OWNERS ASSOCIATION FOR A PERIOD OF 10 YEARS FROM THE FINAL ACCEPTANCE OF ALL PARK IMPROVEMENTS.

- EASEMENT LINE AS NOTED.
- PLAT PERIMETER.

NOTES

1. AN ACCESS AND INSPECTION EASEMENT OVER ALL OF TRACT "R" AND A PORTION OF TRACT "Q" AS SHOWN HEREON IS HEREBY RESERVED FOR AND GRANTED TO THE CITY OF CAMAS, ITS SUCCESSORS AND ASSIGNS, UPON RECORDING OF THIS PLAT. THE CITY OF CAMAS SHALL HAVE 24 HOUR ACCESS TO THE EASEMENT AREA FOR THE PURPOSE OF INSPECTION OF THE STORMWATER MANAGEMENT FACILITY LOCATED IN SAID TRACT "R". THE HOMEOWNERS ASSOCIATION SHALL BE RESPONSIBLE FOR THE MAINTENANCE OF THE STORMWATER FACILITY IMPROVEMENTS WITHIN THE EASEMENT AREA.
2. A PRIVATE STORM SEWER EASEMENT OVER, UNDER, AND UPON ALL OF TRACT "P" AND PORTIONS OF LOTS 196 THROUGH 201 INCLUSIVE, AS SHOWN HEREON IS HEREBY RESERVED FOR AND GRANTED TO THE HOMEOWNERS ASSOCIATION (HOA), AND IT'S ASSIGNS, WITH THE RECORDING OF THIS PLAT FOR THE PURPOSE OF STORM WATER CONVEYANCE. THE HOA SHALL BE RESPONSIBLE FOR THE MAINTENANCE AND REPAIR OF THE STORM WATER CONVEYANCE IMPROVEMENTS WITHIN THE EASEMENT AREA, AND SHALL HAVE RIGHT OF ACCESS ACROSS SAID LOTS TO PERFORM SUCH RESPONSIBILITIES. AND FOLLOWING SUCH USE SHALL RETURN THE EASEMENT AREA TO IT'S PRIOR CONDITION AS NEAR AS POSSIBLE.

UTILITY EASEMENT

A PUBLIC UTILITY EASEMENT IS HEREBY RESERVED OVER, UNDER AND UPON THE EXTERIOR 6.00 FEET OF ALL LOTS AND TRACTS LYING PARALLEL WITH AND ADJACENT TO ALL PUBLIC ROADS FOR THE PURPOSE OF INSTALLING, CONSTRUCTING, RENEWING, OPERATING AND MAINTAINING OF BUT NOT LIMITED TO ELECTRIC, TELEPHONE, TV. CABLE, WATER, GAS, SANITARY SEWER, AND STORM WATER, AND SHALL HAVE RIGHT OF ACCESS FOR SUCH USE. FOLLOWING SUCH USE THE EASEMENT AREA SHALL BE RESTORED TO IT'S PRIOR CONDITION AS NEAR AS POSSIBLE. ALL LOTS CONTAINING MID MOUNT (TRANSFORMERS) ARE SUBJECT TO THE MINIMUM WORKING CLEARANCES AS DEFINED BY CLARK PUBLIC UTILITIES CONSTRUCTION STANDARDS. ALL PROPOSED BUILDING DESIGNS ON THESE LOTS MUST PROVIDE ADEQUATE CLEARANCE FOR ALL COMBUSTIBLE MATERIALS.

PUBLIC SIDEWALK EASEMENT

A PUBLIC SIDEWALK EASEMENT IS HEREBY RESERVED OVER, UNDER AND UPON THE EXTERIOR 6.00 FEET OF ALL LOTS AND TRACTS LYING PARALLEL WITH AND ADJACENT TO ALL PUBLIC ROADS AS NECESSARY TO COMPLY WITH ADA SLOPE REQUIREMENTS.

SCALE: 1" = 40'
0 40 80

TRACT NOTES

TRACT "Q" IS HEREBY CONVEYED TO THE HOMEOWNER'S ASSOCIATION (HOA) UPON RECORDING OF THIS PLAT FOR COMMUNITY PARKING AND STORMWATER FACILITY ACCESS AND UTILITIES. THE HOA SHALL OWN AND BE RESPONSIBLE FOR THE MAINTENANCE OF THE TRACT AND THE PARKING AND STORMWATER FACILITY ACCESS IMPROVEMENTS THEREIN. THE CITY OF CAMAS SHALL HAVE RIGHT OF ENTRY FOR INSPECTION PURPOSES.

TRACT "R" IS HEREBY CONVEYED TO THE HOMEOWNER'S ASSOCIATION (HOA) UPON RECORDING OF THIS PLAT FOR THE PURPOSE OF A STORMWATER MANAGEMENT FACILITY. THE HOA SHALL OWN AND BE RESPONSIBLE FOR THE MAINTENANCE OF THE TRACT AND THE STORMWATER MANAGEMENT FACILITY IMPROVEMENTS THEREIN. THE CITY OF CAMAS SHALL HAVE RIGHT OF ENTRY FOR INSPECTION PURPOSES.

CITY OF CAMAS PUBLIC WORKS DEPARTMENT

ALL IMPROVEMENTS HAVE BEEN INSTALLED OR FINANCIALLY SECURED FOR IN ACCORDANCE WITH THE REQUIREMENTS OF THIS TITLE AND WITH THE PRELIMINARY PLAT APPROVAL.

ALL IMPROVEMENTS CAN OR WILL MEET CURRENT PUBLIC WORKS DRAWING STANDARDS FOR ROAD, UTILITY AND DRAINAGE CONSTRUCTION PLANS.

ORIGINAL AND REPRODUCIBLE MYLAR OR ELECTRONIC RECORDS IN A FORMAT APPROVED BY THE PUBLIC WORKS DIRECTOR OR DESIGNEE AND CERTIFIED BY THE DESIGNING ENGINEER AS BEING "AS CONSTRUCTED" HAVE BEEN SUBMITTED OR FINANCIALLY SECURED FOR CITY RECORDS.

APPROVED BY [signature] 7-9-19
CITY OF CAMAS ENGINEER DATE

CITY OF CAMAS REQUIRED NOTES

1. A HOMEOWNERS ASSOCIATION (HOA) WILL BE REQUIRED FOR THIS DEVELOPMENT. COPIES OF THE FINAL C.C.&R'S SHALL BE SUBMITTED AND ON FILE WITH THE CITY OF CAMAS. IF AT ANY TIME THE C.C.&R'S ARE REVISED, A REVISED COPY SHALL BE SUBMITTED TO THE CITY OF CAMAS.
2. EACH PHASE OF THE SUBDIVISION PLATS SHALL CONTAIN THE APPROVED DENSITY AND DIMENSIONAL STANDARDS TABLE AS APPROVED WITH THIS DEVELOPMENT.
3. THE HOMEOWNERS ASSOCIATION IN IT'S ENTIRETY IS RESPONSIBLE FOR THE MAINTENANCE OF THE STORMWATER FACILITY LOCATED IN TRACT "H", GREEN MOUNTAIN MIXED USE P.R.D. PHASE 1 (SOUTH). THE CITY OF CAMAS SHALL HAVE RIGHT OF ENTRY AT ALL TIMES FOR INSPECTION OF SAID STORMWATER FACILITY.
4. BUILDING PERMITS WILL NOT BE ISSUED BY THE BUILDING DEPARTMENT UNTIL ALL REQUIRED SUBDIVISION IMPROVEMENTS ARE COMPLETED AND THE FINAL ACCEPTANCE HAS BEEN ISSUED BY THE CITY.
5. AUTOMATIC LIFE SAFETY RESIDENTIAL FIRE SPRINKLER SYSTEM DESIGNED AND INSTALLED IN ACCORDANCE WITH NFPA (NATIONAL FIRE PROTECTION ASSOCIATION) 13D IS REQUIRED IN ALL NEW DWELLINGS.
6. THE LOTS IN THE SUBDIVISION ARE SUBJECT TO TRAFFIC IMPACT FEES, SCHOOL IMPACT FEES, FIRE IMPACT FEES, AND PARK/OPEN SPACE IMPACT FEES. EACH NEW DWELLING WILL BE SUBJECT TO THE PAYMENT OF APPROPRIATE IMPACT FEES AT THE TIME OF BUILDING PERMIT ISSUANCE.
7. AT THE TIME OF BUILDING PERMIT ISSUANCE, THE LOTS IN THIS SUBDIVISION ARE SUBJECT TO A $174.92 FEE PER LOT, PAYABLE TO THE CITY OF VANCOUVER, AS THEIR PROPORTIONATE SHARE CONTRIBUTION FOR THE CONSTRUCTION OF A NORTHBOUND RIGHT TURN LANE ON NE 192ND AVE. AND A WESTBOUND RIGHT TURN LANE ON NE 13TH ST.
8. PRIOR TO THE BUILDING DEPARTMENT ISSUING A CERTIFICATE OF OCCUPANCY, EACH LOT SHALL INSTALL A MINIMUM OF ONE 2" CALIPER TREE TO BE LOCATED IN THE PLANTER STRIP OR FRONT YARD OF EACH LOT, AS SPECIFIED ON THE PLAT. REQUIRED TREES SHALL BE MAINTAINED IN GOOD HEALTH, AND DAMAGED OR DYING TREES SHALL BE PROMPTLY REPLACED (WITHIN SIX MONTHS) BY THE HOMEOWNER.
9. PRIOR TO THE BUILDING DEPARTMENT ISSUING A CERTIFICATE OF OCCUPANCY, EACH LOT ABUTTING A CRITICAL AREA TRACT SHALL HAVE A CONTINUOUS 6' BARRIER FENCE INSTALLED ALONG THE APPROPRIATE PROPERTY LINE.
10. IN THE EVENT THAT ANY ITEM OF ARCHAEOLOGICAL INTEREST IS UNCOVERED DURING THE COURSE OF A PERMITTED GROUND DISTURBING ACTION OR ACTIVITY, ALL GROUND DISTURBING ACTIVITIES SHALL IMMEDIATELY CEASE AND THE APPLICANT SHALL NOTIFY THE CITY OF CAMAS PUBLIC WORKS DEPARTMENT AND THE WASHINGTON STATE DEPARTMENT OF ARCHAEOLOGY AND HISTORIC PRESERVATION (D.A.H.P.) AND ADHERE TO THE PROCEDURES SPECIFIED UNDER THE CITY OF CAMAS MUNICIPAL CODE 16.31.150.

DEDICATION NOTE

ALL STREETS AND AVENUES AS DEPICTED ON THIS PLAT ARE HEREBY DEDICATED TO THE CITY OF CAMAS WITH THIS PLAT. ALL TRACTS AND PRIVATE ROADS AS DEPICTED ON THIS PLAT ARE HEREBY DEDICATED TO, AND TO BE MAINTAINED BY, THE HOMEOWNERS ASSOCIATION.

GREEN MOUNTAIN MIXED USE P.R.D.
PHASE 2H

A SUBDIVISION IN A PORTION OF THE T.J. FLETCHER D.L.C. NO. 51
IN THE SE 1/4 OF THE SE 1/4 OF SECTION 17, THE NE 1/4 OF THE NE 1/4 OF SECTION 20,
AND THE NW 1/4 OF THE NW 1/4 OF SECTION 21
T. 2 N., R. 3 E., W.M.,
CITY OF CAMAS, CLARK COUNTY, WASHINGTON
CITY OF CAMAS FINAL ORDER SUB#14-02
JULY, 2019

CITY OF CAMAS REQUIRED NOTES

1. A HOMEOWNERS ASSOCIATION (HOA) WILL BE REQUIRED FOR THIS DEVELOPMENT. COPIES OF THE FINAL C.C.&R'S SHALL BE SUBMITTED AND ON FILE WITH THE CITY OF CAMAS. IF AT ANY TIME THE C.C.&R'S ARE REVISED, A REVISED COPY SHALL BE SUBMITTED TO THE CITY OF CAMAS.
2. EACH PHASE OF THE SUBDIVISION PLATS SHALL CONTAIN THE APPROVED DENSITY AND DIMENSIONAL STANDARDS TABLE AS APPROVED WITH THIS DEVELOPMENT.
3. THE HOMEOWNERS ASSOCIATION IN IT'S ENTIRETY IS RESPONSIBLE FOR THE MAINTENANCE OF THE STORMWATER FACILITY LOCATED IN TRACT "K", GREEN MOUNTAIN MIXED USE P.R.D. PHASE 1). THE CITY OF CAMAS SHALL HAVE RIGHT OF ENTRY AT ALL TIMES FOR INSPECTION OF SAID STORMWATER FACILITY.
4. BUILDING PERMITS WILL NOT BE ISSUED BY THE BUILDING DEPARTMENT UNTIL ALL REQUIRED SUBDIVISION IMPROVEMENTS ARE COMPLETED AND THE FINAL ACCEPTANCE HAS BEEN ISSUED BY THE CITY.
5. AUTOMATIC LIFE SAFETY RESIDENTIAL FIRE SPRINKLER SYSTEM DESIGNED AND INSTALLED IN ACCORDANCE WITH NFPA (NATIONAL FIRE PROTECTION ASSOCIATION) 13D IS REQUIRED IN ALL NEW DWELLINGS.
6. THE LOTS IN THE SUBDIVISION ARE SUBJECT TO TRAFFIC IMPACT FEES, SCHOOL IMPACT FEES, FIRE IMPACT FEES, AND PARK/OPEN SPACE IMPACT FEES. EACH NEW DWELLING WILL BE SUBJECT TO THE PAYMENT OF APPROPRIATE IMPACT FEES AT THE TIME OF BUILDING PERMIT ISSUANCE.
7. AT THE TIME OF BUILDING PERMIT ISSUANCE THE LOTS IN THIS SUBDIVISION ARE SUBJECT TO A $174.92 FEE PER LOT, PAYABLE TO THE CITY OF VANCOUVER, AS THEIR PROPORTIONATE SHARE CONTRIBUTION FOR THE CONSTRUCTION OF A NORTHBOUND RIGHT TURN LANE ON NE 192ND AVE. AND A WESTBOUND RIGHT TURN LANE ON NE 13TH ST.
8. PRIOR TO THE BUILDING DEPARTMENT ISSUING A CERTIFICATE OF OCCUPANCY, EACH LOT SHALL INSTALL A MINIMUM OF ONE 2" CALIPER TREE TO BE LOCATED IN THE PLANTER STRIP OR FRONT YARD OF EACH LOT, AS SPECIFIED ON THE PLAT. REQUIRED TREES SHALL BE MAINTAINED IN GOOD HEALTH, AND DAMAGED OR DYING TREES SHALL BE PROMPTLY REPLACED (WITHIN SIX MONTHS) BY THE HOMEOWNER.
9. PRIOR TO THE BUILDING DEPARTMENT ISSUING A CERTIFICATE OF OCCUPANCY, EACH LOT ABUTTING A CRITICAL AREA TRACT SHALL HAVE A CONTINUOUS 6' BARRIER FENCE INSTALLED ALONG THE APPROPRIATE PROPERTY LINE.
10. IN THE EVENT THAT ANY ITEM OF ARCHAEOLOGICAL INTEREST IS UNCOVERED DURING THE COURSE OF A PERMITTED GROUND DISTURBING ACTION OR ACTIVITY, ALL GROUND DISTURBING ACTIVITIES SHALL IMMEDIATELY CEASE AND THE APPLICANT SHALL NOTIFY THE CITY OF CAMAS PUBLIC WORKS DEPARTMENT AND THE WASHINGTON STATE DEPARTMENT OF ARCHAEOLOGY AND HISTORIC PRESERVATION (D.A.H.P.) AND ADHERE TO THE PROCEDURES SPECIFIED UNDER THE CITY OF CAMAS MUNICIPAL CODE 16.31.150.

LAND INVENTORY

TOTAL ACREAGE:	8.91 AC.
TOTAL DEVELOPED ACREAGE:	2.37 AC.
* INCLUDES LOTS AND PUBLIC STREET	
TOTAL LOT AREA:	2.00 AC.
TOTAL INFRASTRUCTURE AREA (PUBLIC STREET):	0.37 AC.
TOTAL TRACT AREA (TRACT "SS"):	0.22 AC.
TOTAL ACREAGE OF OPEN SPACE & CRITICAL AREAS:	6.54 AC

DEVELOPMENT STANDARDS

	SINGLE FAMILY ("E" PODS) LOTS 216-228
MINIMUM LOT AREA	4,200 S.F.
MAXIMUM LOT AREA	9,000 S.F.
MINIMUM LOT WIDTH	50'
MINIMUM LOT DEPTH	80'
MINIMUM LOT WIDTH ON A CURVE OR CUL-DE-SAC	30'
MAXIMUM BUILDING HEIGHT (SEE NOTE 5)	35'
MAXIMUM BUILDING COVERAGE	40%

MINIMUM SETBACKS

SINGLE FAMILY LOTS ("E" PODS) LOTS 216-228	5,000 SF TO 7,499 SF	7,500 SF TO 14,999 SF
FRONT YARD (INCLUDES 6' PUBLIC UTILITY EASEMENT), SEE ALSO NOTE 6	15'	20'
GARAGE SETBACK FROM R.O.W. (SEE NOTE 6)	18'	20'

APPENDIX H

LIMITATIONS

This report is intended for the sole use of the client indicated above and must not be distributed to, or used by, others without our knowledge. It is based on the documents and information provided to us and the findings at the time of our on-site review.

It is a basic assumption that any correspondence, material, data, evaluations, and reports furnished by others are free of latent deficiencies or inaccuracies except for apparent variances discovered during the completion of this report.

Unless specifically noted in this report, no testing, verification of operation of systems, review of concealed elements, intrusive openings, opening of system components for internal inspection, detailed analysis or design calculations were conducted, nor were they within the scope of this review.

Some of the findings herein are based on a random sampling visual review of the surface conditions, discussions with the Board of Directors and/or their designated representatives, and review of relevant documents. Observations were made only of those areas that were readily accessible during our review. Deficiencies existing but not recorded in this report were not apparent given the level of study undertaken. Unless otherwise indicated in this report, components are assumed to be suitable for their intended use and are being used under normal service conditions. Finally, for this year's update, we have not undertaken a physical review of subsurface conditions or concealed structural systems.

It is possible that unexpected conditions may be encountered at buildings/facilities that have not been explored within the scope of this report. Should such an event occur, EC should be notified in order that we may determine if modifications to our conclusions are necessary.

In issuing this report, EC does not assume any of the duties or liabilities of the designers, builders, or owners of the subject property. Owners, prospective purchasers, tenants, or others who use or rely on the contents of this report do so with the understanding as to the limitations of the documents reviewed and the general visual review undertaken and understand that EC cannot be held liable for damages they may suffer in respect to the purchase, ownership, or use of the subject property.

Professional judgment was exercised in gathering and analyzing the information obtained and in the formulation of the conclusions. Like all professional persons rendering advice, we do not act as insurers of the conclusions we reach, but we commit ourselves to care and competence in reaching those conclusions. No warranties, either expressed or implied, are made.
